The work participation rate is calculated by determining the number of TANF and VTP recipients who are considered to be "work-eligible individuals." The cases containing these client become the "denominator." To determine the numerator, activities of each of the work eligible persons is examined to estimate if Federal work participation requirements are met for the month. While not complex, the requirements are fairly detailed. They are enumerated in the reauthorization of the Temporary Assistance for Needy Families Program, Interim Final Rule as promulgated by the Department of Health and Human Services, Administration for Children and Families. The rate presented here is the all families rate, i. e. the overall rate, including VTP..

Estimated TANF only Work Participation Rates for September

These are estimated locality September 2007 work participation rates that include only clients receiving TANF. The official participation rate for these cases will be calculated by the Federal Administration for Children and Families from more complete files that are submitted quarterly. The estimated September statewide rate is 35% with a denominator of 13,828 and a numerator of 4,873. VTP only estimates are on pages v and vi.

All VTP recipients are considered to be “work-eligible individuals.” Thus, all VTP cases are in the “denominator.” To determine the numerator, job follow-up entries are reviewed to estimate if Federal work participation requirements are met for the month. The basic requirement for VTP recipients is employment for at least 30 hours per week. The requirement is contained in the reauthorization of the Temporary Assistance for Needy Families Program, Interim Final Rule as promulgated by the Department of Health and Human Services, Administration for Children and Families. The rates presented here are also sometimes referred to as the rates for the maintenance of effort program caseload. .

TANF

The rankings are displayed to provide some indication of relative standing. They are not intended to represent scaled performance measures. Ties were resolved by carrying out the numbers to greater detail than displayed, and then if ties remained, FIPS code order was used. The calculation of scores is done to make the determination of a combined rank more equitable. See the bottom of the endnotes on page 44 for an explanation of how the scores are calculated.

VIEW Rankings, From Inception of VIEW

This section lists the relative cumulative rankings of localities by Percent Enrolled who became Employed, Average Monthly Earnings, and Percent Employed Five Months after Initial Employment. Scores from 0 to 10 are also assigned and the scores averaged to calculate an overall rank.

The rankings are displayed to provide some indication of relative standing. They are not intended to represent scaled performance measures. Ties were resolved by carrying out the numbers to greater detail than displayed, and then if ties remained, FIPS code order was used. The calculation of scores was begun in May 1999 to make the determination of a combined rank more equitable. See the bottom of the endnotes on page 44 for an explanation of how the scores are calculated.

Definitions of Selected Terms Contained in Report

Average Monthly Earnings. This is the average monthly earnings of the unsubsidized jobs that participants obtained. The value is calculated by multiplying the hourly wage by the weekly hours worked by 4.3 average weeks per month. For the cumulative figures the initial wage and initial hours are used. For the current figures, the initial wage and most current hours are used, except for the November 2001 report which used initial hours. Earlier than June 1999, wage changes that were entered overwrote the initial wage, so prior to that date, the cumulative figures used the initial hours and the last wage entered. With the advent of the VIEW Transitional Payment (VTP) program in October 2006 the end of month average monthly earnings might be expected to decline somewhat because prior to VTP, cases with high earnings might remain open for job follow-up, but after the implementation of VTP the VIEW case would be closed when the TANF case was closed and a VTP case opened. VTP cases are not included in this report except for estimating the participation rate.

Average Wage. The average of the wages reported for each occurrence of unsubsidized employment. After June 1999 the wage is the wage at hiring, that is, the initial wage. Prior to June 1999, that wage may have been updated if changed during employment. After the implementation of the VIEW Transitional Payment program the end of month point in time average wage might be expected to decline some for the same reason mentioned in the explanation of possible decline in Average Monthly earnings, above. See note 6 on page 44.

Cases Closed with Employment. These are TANF or TANF-UP cases that are closed with an indication in the data base of employment at the date of closure. It does not mean that the case necessarily closed because of employment. For example, a TANF case may have an indication of closing at the client's request, along with indication of existing employment in VIEW. That case is counted as closed with employment.

EDD. This stands for Economic Development District. EDDs were developed during the administration of Governor Allen. They generally are not longer in use. This report continues to refer to them because VIEW was phased in by EDD and their use provides consistency over time.

Enrolled. Unduplicated number by locality of TANF recipients who were interviewed, received an individual assessment, signed the Agreement of Personal Responsibility, and enrolled in the VIEW program. Because the count is by locality, a recipient may be counted once in more than one locality. The fiscal year to date numbers include those who were enrolled at the beginning of the fiscal year as well as those enrolled during the year. There are clients enrolled in VIEW who have had their TANF case closed because VIEW policy requires that the enrollment remain open for job follow-up after employment unless the employment meets federal work participation guidelines, in which case the VIEW case is closed and a VIEW Transitional Payment (VTP) case is opened.

Full Time Employment. Employment at 30 hours a week or greater.

Participants Assigned to Inactive. Inactive is a status assigned to participants who cannot participate in the VIEW program for reasons other than being exempt. Examples are unavailability of child care, unavailability of transportation, and mental or medical problems that make participation impractical. Inactive participants are due to be reviewed each month. While in inactive status, the 24 month time limit for TANF benefits is suspended.

Participants Employed. Total number of participants by locality who ever obtained an unsubsidized job, either full time or part time. If employed more than one time, they are still only counted once, but may be counted in more than one locality. Also, these participants may have left their job and not gotten another one. For the year to date numbers, those employed at the beginning of the fiscal year are included as well as those who first became employed in the fiscal year.

Participants in a Work Activity. Unduplicated count by locality of persons who have been in any of the following components: unsubsidized employment, full employment program (FEP), on-the-job training (OJT), community work experience program (CWEP), public service program (PSP), vocational education and training, and job search/job readiness. For example, a person who was in community work experience and then employed would be counted only once.

For the year to date numbers, those in a work activity at the beginning of the fiscal year are included as well as those who first entered a work activity in the fiscal year. Note that this is a revised definition of work activity from reports through October 2006. The revised definition captures the activities that count toward the first 20 hours of federal participation requirements – the core work activities. Clients who are counted as being in a core work activity must meet additional participation rate requirements in order to be included in the work participation rate, and only VIEW clients are counted here, not all work eligible TANF clients **Thus, these percentages in a work activity are quite different from the percentages in the TANF work participation rate.**

Part Time Employment. Employment at fewer than 30 weekly hours.

Referred. Unduplicated number of TANF recipients by locality who were initially evaluated as eligible for VIEW and had their names referred to the automated VIEW list for participation.

Relationship Between TANF and VIEW Participation. On the chart at page 5a, the column heading “Total Adults in the Case” includes adults who are not considered to be part of the assistance unit. For example, a mother receiving SSI may be in the case, but because she receives SSI is not considered eligible for TANF and thus is not part of the assistance unit. Persons such as she who are not in the assistance unit are not eligible to participate in VIEW. Also included are adults who are part of the assistance unit but exempt from VIEW

Five Months Employment. This represents the percent of all participants that were employed 150 days after their first employment. Participants who are employed in any job 150 days after their first employment are counted in this measure.

Three Months Employment. This represents the percent of all participants that were employed 90 days after their first employment. Participants who are employed in any job 90 days after their first employment are counted in this measure. For year to date percents, the calculations are based on the first employment that began one year before the end of the report month. That employment may not have been the first ever for the participant. The year to date percents were calculated differently in reports before September 2004. Also for year to date percents, transferred cases were not counted for months after the January 2002 report.

TANF / TANF-UP Payment Cases. Up to November 2003 these counts were taken from a monthly report with no adjustment. After that, the monthly counts included some cases that were being paid because child support payments had been received and were being passed on. These counts were adjusted to mostly eliminate those additional cases. Further adjustment may be appropriate. It should also be noted that the counts include both strictly TANF cases and MOE cases for some years. With the end of waiver provisions in July 2003, a substantial part of the caseload was placed in a state program and funded with MOE funds. This change in July 2003 was a change in funding, not a change in eligibility requirements or case payment amounts. It ended in September 2006 when VIEW transitional payments were introduced

VIEW Transitional Payments (VTP). Beginning in October 2006, VIEW Transitional Payments (VTP) were introduced. These are payments of \$50 per client per month for one year to VIEW clients that leave “regular” TANF with employment sufficient to meet Federal work participation requirements. The employment must be maintained to be eligible for VTP. Previously, VTP clients normally would have remained VIEW clients for five or six months of job-follow-up. Thus, the VTP program has had a diminishing effect on some of the statistics in this report such as end of month percent employed and average wage. See graph on page 5a.

Time That Data Represent. The data in the top sections of page 4 and pages 8 – 24 are point in time data as of the date indicated. The year to date section represents state fiscal year to date data, with the exception of three month retention (see above). The bottom section is cumulative from when the locality began VIEW. The participation rate is calculated for a month preceding the report month in order to capture any delayed data entry.

General Statement About Accuracy. The report is based on an extract from the Employment Services automated system. The extract is normally made the night of the first work day after the end of the report month. Data that staff of local social services agencies enter into the automated system after the time of the extract are not included in the report, even though the activity reflected actually occurred in the report month. However, that data, and the activity reflected, are included in the reports for subsequent months. Further, because the data are entered by staff in the 120 localities, the accuracy of the data in the data base is, of course, subject to inadvertent error.

Pages 31-39 have N/A because new year to date calculations began on July 1, 2007. Work Activity entries begin in October. August diversionary assistance counts did not correctly match localities.

¹ Applications are not necessarily acted upon in the month that they are received. Also, applications may be transferred from regular TANF to TANF-UP and vice versa as they are processed.

² These TANF cases paid counts are prior to possible adjustment. See definition of payment cases. Note that a VIEW case may remain open for job follow-up after the corresponding TANF case closes.

³ VIEW enrolled counts do not include VTP clients

⁴ A case may be open in more than one locality during the time period.

⁵ Prior to June 1999, when individuals were transferred from one locality to another, their history was transferred as well. This may have an effect on a locality's cumulative VIEW statistics.

⁶ The minimum wage rose from \$5.15 to \$5.85 an hour on 7/24/07. The report reflects initial wages so any effect on wages in the report will be delayed. The average wage includes full and part time, unless otherwise indicated. See the definition of average wage on page 42.

⁷ Includes full and part time earnings.

⁸ This represents the percent of all participants that were first employed three months or more before the end of the report month and who were employed three months after the date of that employment. Employment may or may not have been continuous. See definition on page 43 for the revised method of calculating the year to date percentages.

⁹ This represents the percent of all participants that were first employed five months or more before the end of the report month and who were employed five months after the date of that employment. Employment may or may not have been continuous.

¹⁰ Number includes TANF-UP and represents cases carried over to the next month. Note that a VIEW case may remain open for job follow-up after the corresponding TANF case closes, but with the advent of VIEW Transitional Payments (VTP) such occurrences should be rare.

¹¹ Enrollment is timely if done within 30 days of referral in previous month of the state fiscal year.

¹² Placement in a work activity on the 95th day after referral was a measure of timeliness before Oct 1, 2006. The revised definition of work activity has increased the percentage from reports before November 2006. Clients whose cases have closed before the 95th day are excluded, so 100% is an attainable mark

¹⁴ As of October 1, 2007. Some referrals to the waiting list are not appropriate, and there may be considerable lag time in correcting them..

This report may be available on the Department of Social Services web site: www.dss.virginia.gov. On the site, click on Reports to the left and then scroll to TANF at the bottom of the Reports page.

The scores in the VIEW Rankings are determined by placing a locality on a scale of zero to ten in the same relative position as its place in the difference between the high and low of the measure in question. This converts all measures to a similar scale and provides a more equitable way to combine the ratings in each measure to determine a combined rank. (Questions, please call 804 726-7618.)
