Table of Contents

Introduction ................................................. i

I. Health, Safety, and Nutrition Practices .......... 1

   1.1 General Policies/Procedures
   1.2 Control of Communicable Disease
   1.3 Routine Oral Hygiene
   1.4 Reduction of Environmental Hazards
   1.5 Sanitation Procedures
   1.6 Prevention of Injuries
   1.7 Immediate Response to Injuries
   1.8 Follow-Up Response to Injuries
   1.9 Emergency Preparedness

2. Abuse/Neglect ........................................... 10
   2.1 Suspected Abuse/Neglect

   3.1 Nutrition
   3.2 Food Selection and Preparation
   3.3 Mealtime Behaviors
   3.4 Response to Food Preferences

4. Communication with Families ....................... 12
   4.1 Respect
   4.2 Communication Regarding Policies
   4.3 Communication Regarding Special Needs
   4.4 Communication Regarding Nutrition and Food

5. Health Education .................................... 13
   5.1 Basic Health Practices
   5.2 Nutrition Education
   5.3 Safety Education
   5.4 Education for Healthy Self-Care
   5.5 Health and Safety Resources

II. Understanding Child Growth and Development. .... 15

1. Basic Child Development ............................. 19
   1.1 Developmental Patterns and Principles
   1.2 Adaptation of Practices as Development Proceeds
   1.3 Developmental Domains
   1.4 Interconnectedness of Domains
   1.5 Stages Versus Continuous Development
   1.6 Variability in Developmental Milestones

2. Typical and Atypical Development .................. 21
   2.1 Recognizing Variation as Typical
   2.2 Recognizing Atypical Development
   2.3 Adapting the Learning Environment
   2.4 Indicators of Risk
   2.5 Individualized Family Service Plans (IFSPs) and Individualized Educational Programs (IEPs)
   2.6 Recognizing and Respecting Developmental Challenges

3. Individual Differences .............................. 22
   3.1 Respecting Personality Differences

4. Influences on Development .......................... 22
   4.1 Influences on Development
   4.2 Family as Primary Environment
   4.3 Stress as Environmental Factor
   4.4 Variation in Cultural Practices
### Table of Contents (continued)

#### 5. Strategic Facilitation of Development
- 5.1 Role of Relationships
- 5.2 Role of Experience
- 5.3 Role of Play
- 5.4 Principles of Play
- 5.5 Role of Adults in Play

#### 6. Collaboration
- 6.1 Collaboration on Behalf of Children
- 6.2 Collaboration with Adults

#### III. Appropriate Child Observation and Assessment
- 1. Assessment Plan and Procedures
  - 1.1 Assessment Planning
  - 1.2 Assessment Procedures
  - 1.3 Individualized Family Service Plans (IFSPs) and Individualized Educational Programs (IEPs)
  - 1.4 Responsive Use of Assessment Data
  - 1.5 Multidisciplinary Teams
- 2. Communication with Families
  - 2.1 Listening to and Learning from Families
  - 2.2 Sharing Assessment Results
- 3. Confidentiality
  - 3.1 Maintaining Confidentiality
  - 3.2 Avoiding Negative Labeling

#### IV. Partnering with Families and Community
- 1. Knowing and Respecting Families
  - 1.1 Mutual Respect
  - 1.2 Respect for All Families
  - 1.3 Welcoming Environment
  - 1.4 Positive Relationships
- 2. Communication
  - 2.1 Listening to Families
  - 2.2 Involving Families
  - 2.3 Communicating Regarding Child’s Activities
  - 2.4 Communicating Regarding Child’s Progress
  - 2.5 Communicating Regarding Atypical Development or Special Needs
  - 2.6 Communicating in Ways Families Can Understand
  - 2.7 Maintaining Confidentiality
  - 2.8 Recognizing Symptoms of Stress
  - 2.9 Nurturing Families in Rearing Children
  - 2.10 Arranging Opportunities for Collaboration and Support
  - 2.11 Involving Families in Policy Decisions
- 3. Collaborative Community Partnerships
  - 3.1 Facilitating Education and Awareness of Community Resources
  - 3.2 Facilitating Linkages Between Families and Community Resources
  - 3.3 Facilitating Access to Community Resources
  - 3.4 Agreements with Community Agencies, Organizations, and Businesses
  - 3.5 Participating as Citizen in Community-at-Large
Table of Contents (continued)

4. Nurturing Families as Advocates ......................... 42  
   4.1 Transitions  
   4.2 Service Acquisition  
   4.3 Consent to Share Information

V. Learning Environment ................................. 43  

1. Overall Learning Environment ....................... 47  
   1.1 Components of Learning Environment  
   1.2 Appropriate and Responsive Teaching  
   1.3 Continuity of Care

2. Learning Strategies .................................. 48  
   2.1 Effective Learning Strategies  
   2.2 Encouraging Participation  
   2.3 Facilitating Curiosity, Exploration, and Play  
   2.4 Articulating the Rationale for Study-Based Learning Strategies  
   2.5 Creating a Context that Supports Curiosity, Exploration, and Play  
   2.6 Sequential Patterns of Development in Exploration and Play  
   2.7 Adapting Learning Environments to Support Learners with Atypical Developmental Patterns

3. Curriculum ........................................... 50  
   3.1 Curriculum Philosophy  
   3.2 Curriculum Framework  
   3.3 Social and Emotional Development  
   3.4 Approaches to Learning  
   3.5 Language and Literacy  
   3.6 Learning about Mathematical Concepts  
   3.7 Learning about the World (Scientific Knowledge, Scientific Inquiry and Exploration)  
   3.8 Learning about Families and Communities  
   3.9 Fine Arts  
   3.10 Physical Development and Health

4. Schedules, Routines, and Transitions ............... 55  
   4.1 Predictable and Flexible Schedules and Transitions  
   4.2 Balanced Schedules

5. Physical Environment ................................ 56  
   5.1 Environments That Nurture Development  
   5.2 Monitoring Physical Environment  
   5.3 Current Trends in Environmental Design

6. Materials and Equipment ............................. 57  
   6.1 Materials Appropriate to Age and Ability  
   6.2 Culturally Responsive Materials and Equipment  
   6.3 Variety in Materials and Equipment

7. Collaboration ......................................... 58  
   7.1 Collaborating with Peers to Improve Learning Environment  
   7.2 Collaborating with Community to Improve Learning Environment

VI. Effective Interactions  
   (Teacher/Student and Student/Student) ............... 59  

1. Relationships ....................................... 63  
   1.1 Respect  
   1.2 Psychological Safety and Attachment  
   1.3 Respectful Voice Tones  
   1.4 Building Trust  
   1.5 Establishing a Calm, Unhurried Environment  
   1.6 Respecting Diversity  
   1.7 Accepting Individual Differences
# Table of Contents (continued)

2. **Interactions with Persons of Various Ages Across the Lifespan** .................................................. 65  
   2.1 Mixed-age Children’s Groups  
   2.2 Intergenerational Activities

3. **Group Interactions** ................................................. 65  
   3.1 Group Process and Structure  
   3.2 Managing Group Behaviors

4. **Communication** .................................................. 66  
   4.1 Engaging in Various Forms of Communication  
   4.2 Basic Listening  
   4.3 Listening for Feelings  
   4.4 Verbal and Non-Verbal Expression  
   4.5 Communication Frequency  
   4.6 Vocal Communication Strategies  
   4.7 Variation in Communication Strategies

5. **Guidance** .......................................................... 68  
   5.1 Behavioral Expectations  
   5.2 Expectations for Respectful Interactions  
   5.3 Nurturing Autonomy and Self-Regulation  
   5.4 Logical Consequences  
   5.5 Prosocial Behavior  
   5.6 Managing Change  
   5.7 Prevention of Behavioral Problems  
   5.8 Challenging Behaviors  
   5.9 Conflict Resolution

6. **Family Collaboration** ........................................... 71  
   6.1 Positive Communication  
   6.2 Respecting Family Values  
   6.3 Collaborative Guidance  
   6.4 Resources for Behavioral Interventions

VII. **Program Management** ........................................... 73  
   1. **Regulatory Standards** ........................................ 78  
      1.1 Required Legal Standards  
      1.2 Regulations from Other Agencies  
      1.3 Voluntary Compliance with Quality Standards  
      1.4 Record Keeping  
      1.5 Display of License or Certificate  
      1.6 Planning for Emergencies
   2. **Physical Facility** ............................................... 80  
      2.1 Facilities Management  
      2.2 Environmental Monitoring  
      2.3 Responsibility for Environment  
      2.4 Space
   3. **Budget Management** ......................................... 82  
      3.1 Budget Management  
      3.2 Budget Planning  
      3.3 Budget Monitoring  
      3.4 Resource Monitoring  
      3.5 Marketing  
      3.6 Technology  
      3.7 Accounting  
      3.8 Insurance  
      3.9 Risk Reduction  
      3.10 Emergency Drills
**Table of Contents (continued)**

4. **Human Resources Management** ........................................ 84  
   4.1 Human Resources Policies  
   4.2 Internal Communication  
   4.3 Schedule  
   4.4 Employee Satisfaction  
   4.5 Employee Recognition  
   4.6 Compensation  
   4.7 Benefits  
   4.8 Advocacy  
   4.9 Collegiality  
   4.10 Professional Development  
   4.11 Staff Assessment  
   4.12 Assessment of Program Director  

5. **Program Planning and Evaluation** .............................. 88  
   5.1 Planning the Learning Environment  
   5.2 Mission, Goals, Philosophy  
   5.3 Program Evaluation  
   5.4 Support of Learning  

6. **Families and Community** ........................................... 89  
   6.1 Family Communication  

**VIII. Teacher Qualifications and Professional Development** .............................. 91  
   1. **Commitment to Quality** ............................................ 95  
      1.1 Regulatory Standards  
      1.2 Quality Improvement  
   2. **Professional Development** ....................................... 96  
      2.1 Content Knowledge  
      2.2 Use of Resources (Materials, Time, Space)  
      2.3 Hygiene and Appropriate Dress  
      2.4 Professional Attitude  
      2.5 Positive Relationships with Colleagues  
      2.6 Professional Work Habits  
      2.7 Supporting Program Goals  
      2.8 Continuous Updating of Knowledge  
      2.9 Participating in Reflective Practice and Research/Inquiry  
      2.10 Philosophy of Early Childhood Practice  
      2.11 Foundations of Early Childhood Practice  
      2.12 Balancing Work and Personal Growth  
      2.13 Continuous Professional Development  
   3. **Advocacy** ................................................................. 98  
      3.1 Communicating with the Broader Community  
      3.2 Understanding Professional Advocacy  
   4. **Ethics** ................................................................. 99  
      4.1 Ethics in Communications and Interactions  
      4.2 Ethics Pertaining to Confidentiality  
      4.3 Commitment to Other Professionals

Virginia's Alignment Project

Introduction

Without a doubt, the early years – from birth to kindergarten – comprise the most extraordinary period of development in a child’s lifetime.

Learning begins in infancy when a child’s development of knowledge, skills, and attitudes toward learning serves as the basis for healthy development and lifelong achievement. Infants and young children are by nature avid learners – enthusiastic, creative scientists who observe, explore, experiment, and practice skills until they are mastered, and then continue to the next challenge.

Although they learn much through independent exploration, infants and young children need competent adult guides to provide the critical elements of high quality learning environments at optimal times. Skillful adults – whether parents, grandparents, child care providers or teachers - provide the safety and security, both physical and emotional, that support young learners through adventures of discovery and mastery. Skillful adults provide more than affectionate relationships that support and foster confidence; they structure the environment to provide challenges, coach the learning process by providing feedback, and offer interpretation to confirm and to inspire. These skillful adults become learning partners who mentor young children as they explore the world in which they live.

It is vital that we support Virginia’s young children as they prepare for school and life success. The Alignment Project documents serve as guides to assist adults in their important roles with young children.

Guiding Principles

The Alignment Project documents reflect a set of guiding principles that have served as a valuable compass in developing these resources:

1. Families are the first and most influential teachers of young children.
2. Every child develops at an individual rate, possesses unique characteristics, and exhibits an array of talents and interests regardless of family background, culture, special need, experience, or ability.
3. Optimal learning occurs when we recognize that all aspects of a child’s development (i.e., social and emotional, approaches to learning, language and literacy, cognitive, and physical) are inextricably interrelated and nurtured through a combination of active exploration, play, social interaction, and thoughtfully planned activities that capitalize on children’s natural tendency to seek ever higher levels of challenge to master.
4. Early learning experiences draw upon and enhance the connections between families, early childhood programs and services, schools, and the community.
5. Quality early learning experiences for children are guided by research-based knowledge and practice.
6. All children are capable and competent learners, and they learn best when they are included with their peers.
Developing the Alignment Project Documents

These frameworks were developed through a comprehensive and collaborative process involving many sources of information, expertise, and guidance.

The process began in February, 2006, through an intensive initiative known as the Alignment Project. Though spearheaded by the Virginia Department of Social Services, the Alignment Project team is comprised of dedicated professionals from many agencies and organizations, both public and private. Each of the team members brought insight and wisdom reflecting years of experience, expertise, and commitment.

Following the development of the original draft documents, critical reviews were conducted by numerous early childhood professionals who provided feedback and suggestions for improvement. In addition, six focus groups were held in six different regions across the Commonwealth to gather broad feedback on the Alignment work, as well as specific feedback concerning draft documents. The participating individuals represented various relevant constituent groups, selected to offer a full range of perspectives, thereby ensuring inclusion and integration of varied needs, programs, and cultures to the greatest extent possible. Working within a tight timeframe, the reviewers provided valuable edits and additions, contributing substantively to the final products.

Finally, the Alignment Project benefited in significant ways by reviewing and incorporating guidelines and competencies gleaned from early childhood initiatives from numerous states and local coalitions. Thanks to the graciousness and generosity of key representatives from each state and locality in granting permission for the team to learn from their respective processes and products, the Alignment Team feels assured that Virginia’s frameworks reflect best practices across the nation.

Acknowledgements

The Alignment Project Team wishes to express gratitude to the following individuals who contributed to the development of Virginia’s Milestones of Child Development:

Alignment Project Team

Mark Allan, Virginia Department of Education
Zelda Boyd, Virginia Department of Social Services
Tanya High Brooks, United Way Success by 6
*Elizabeth Crawford, 2006 Governor’s Fellow
Kathy Gillikin, Virginia Department of Social Services
Kathy Glazer, Virginia Department of Social Services and Secretariat of Education
*Teresa Harris, James Madison University
Cori Hill, Partnership for People with Disabilities
Arlene Kasper, Virginia Department of Social Services
Aleta Lawson, Virginia Department of Social Services
Kathy Massie, Virginia Head Start Association
David Mills, Virginia Department of Mental Health, Mental Retardation and Substance Abuse Services
Phyllis Mondak, Virginia Department of Education
Helen O’Beirne, 2006 Governor’s Fellow
Debra O’Neill, Virginia Department of Social Services
*Cosby Steele Rogers, Virginia Polytechnic Institute and State University
Karen Schulman, National Women’s Law Center
Carolynne Stevens, Virginia Department of Social Services
Cheryl Strobel, Virginia Department of Education
Barbara Tayman, National Child Care Information Center
Mary Jo Thomas, Virginia Department of Social Services
Carole Whitener, Tidewater Community College

*Special thanks to Elizabeth Crawford, Teresa Harris, and Cosby Rogers, who contributed the lion’s share of the writing and developing of drafts for the team.
Independent Reviewers
Martha Ann Bell, Virginia Polytechnic Institute and State University
Barbara F. Boyd, Radford University
Judy Apostolico-Buck, Arlington Public Schools
Gail Bjorklund, Fairfax County Office for Children
Isabel Bradburn, Virginia Polytechnic Institute and State University
Rosemary Burton, Minnieland
Toni Cacace-Beshears, Virginia Association for Early Childhood Education
Lori Connors-Tadros, National Child Care Information Center
Brenda Cubero, Family Child Care Provider and mother
Mary Margaret Gardner, Virginia Association for Early Childhood Education
Kim Gregory, Virginia Western Community College
Pat Henry, Early Head Start, TAP Roanoke
Kathryn A. Hoover, Radford University
Johnnie Humphrey, John Tyler Community College
Cathy Jacobs, Virginia Polytechnic Institute and State University
Susan Jakob, Virginia Western Community College
Dianne Koontz Lowman, Region 5 T/TAC at James Madison University
Sarah LeMoine, National Child Care Information Center
Patsy Moon, Virginia Commonwealth University, MCV Child Care Services
Robin Panneton, Virginia Polytechnic Institute and State University
Annie Papero, James Madison University
Boyoung Park, Radford University
Janet K. Sawyers, Virginia Polytechnic Institute and State University
Rachel Schumacher, Center for Law and Social Policy
Kristi Snyder, Rainbow Riders
Marshann Snyder, Fairfax County, Office for Children, Institute for Early Learning
Karla Sprouse, Early Head Start, Child Development Resources, Williamsburg
Edyth Wheeler, Virginia Association for Early Childhood Education
Penny White, Training & Curriculum Specialist, Fort Lee
Jay Wilkins, Virginia Polytechnic Institute and State University

Thanks also to the following colleagues for their valued contributions to the Alignment Project initiative:
Katherine Kersey, Old Dominion University
Marcia Kraft-Sayre, University of Virginia
Jennifer Locasale-Crouch, University of Virginia
Marie Masterson, Old Dominion University
Amelia Kable Moody, University of Virginia
Lori Morris, Virginia Early Childhood Foundation
Bob Pianta, University of Virginia

Focus Group Participants
More than one hundred parents, teachers, directors, child care resource and referral agency staff, and other interested partners attended the focus groups in Abingdon, Fairfax, Harrisonburg, Richmond, Roanoke, and South Hampton Roads.

An additional focus group comprised of early childhood educators Debra Daily, Renee Dino, Regina Ihsane, Claudia Knapp, and Rowena Seaman from Williamsburg-James City County offered important feedback concerning the content and format of the Competencies for Early Childhood Professionals.

We are grateful for the contribution of all focus group participants to this project in providing valuable feedback and guidance.

Finally, the Alignment Project Team wishes to express gratitude to the following for encouragement and support:
The Honorable Thomas R. Morris, Secretary of Education
The Honorable Marilyn B. Tavenner, Secretary of Health and Human Resources
Judy Heiman, Deputy Secretary of Education
Gail Jaspen, Deputy Secretary of Health and Human Resources
Anthony Conyers, Commissioner of Virginia Department of Social Services
Eleanor Saslaw, Board of Education Pre-K Committee
Welcome to Virginia’s Competencies for Early Childhood Professionals!

This document is a comprehensive resource for those who work with and care about young children. We hope you will find this document valuable and that you will share it with others.

Purpose and Goals
In order to support optimal learning and achievement for young children, Virginia must have a highly skilled early childhood education professional workforce that embraces a spirit of life-long learning and continuous quality improvement. To articulate the skills and competencies desired in that workforce, Virginia’s Competencies for Early Childhood Professionals outline standards for competent practice, identifying what early childhood professionals must know, be able to do, and care about to provide quality early care and education.

Because these competencies can be measured or demonstrated, Virginia’s Competencies for Early Childhood Professionals can serve as a guide for improving teaching and learning. They are intended to support improvement of quality in early childhood programs by clearly articulating best practices for adults who are supporting the growth and development of children from birth to kindergarten. In essence, the professional development system itself is never a finished product and should continually evolve based on the most recent research and be refined to best meet the needs of the population it serves. To that end, early childhood practitioners need opportunities to learn and grow to become more effective in their profession.

Virginia’s Competencies for Early Childhood Professionals may be used by adults working in various capacities with young children and by related organizations or agencies, including:

- **Providers, practitioners, and teachers** to assess their level of knowledge and skill in various content areas and to identify specific areas of need for future professional development (e.g., training/education);

- **Directors and program administrators** to specify training/education requirements for staff job descriptions, to develop staff training/education plans and policies, and to establish a salary scale based on staff educational achievement;

- **Trainers and training organizations** to plan and to organize training/education and to promote training/education opportunities;

- **Higher education faculty, staff, and administrators** to assess current program content to determine course development and to coordinate and design course content to facilitate transfer and articulation agreements;

- **Federal, state, and local agencies** to develop and implement policies that will enhance professionalism in the field; and for

- **Professional development efforts** to create the framework for a career development system that allows professionals to achieve recognition in the field, provides access to competency-based training/education, and promotes compensation commensurate with educational achievement.
Presentation of Content Areas and Levels

Virginia’s Competencies for Early Childhood Professionals are presented in specific core areas of competency that correspond to traditional curricular areas in early childhood education. Further, the core competencies address best practices for a safe and optimal learning environment for young children, effective relationships and interactions with children and their families, and strong program management for early childhood administrators. Each area describes the knowledge and skills professionals need in order to support optimal growth and learning of children from birth to kindergarten.

The eight core areas of competency used to organize Virginia’s Competencies for Early Childhood Professionals are:

- Health, Safety, and Nutritional Practices;
- Understanding Child Growth and Development;
- Appropriate Classroom Observation and Assessment;
- Partnering with Families and Communities;
- Learning Environment;
- Effective Interactions;
- Program Management; and
- Teacher Qualifications and Professional Development.

Importantly, all early childhood professionals working with children from birth to kindergarten, regardless of role or setting, need to master a core body of knowledge. However, professionals may apply the knowledge differently depending on their roles and settings. For example, infant-toddler professionals need to develop competency in supporting beginning language development, and preschool professionals need to develop competency in supporting specific language skills such as speaking in more complex sentences and following multi-step directions. Program directors, school administrators and supervisors need skills in supervision to ensure that staff demonstrate competency in supporting developmentally appropriate language acquisition. These variations require different applications of knowledge. For this reason, the content area of Program Management applies to directors and administrators as well as to family care providers who have responsibility for program management.

Within each content area, four competency levels are presented to establish a continuum from preliminary skills to an advanced level of academic preparation and varied experience. Professionals progress from one level to another through various paths including formal study, training, mentoring and coaching, and reflection on practice. Importantly, levels are defined for early childhood professionals serving varying roles. Advancement does not imply administrative promotion resulting in little or no direct interaction with children. Rather, as all professionals develop, they participate in continuous quality improvement by acquiring new skills, refining previously developed skills, promoting skill development among others, adding to the knowledge base of the field of early childhood education through research and reflective inquiry, and working with others to advocate policies and quality programs that nurture the development of all children. Early childhood professionals are encouraged to advance their knowledge and skill sets across content areas.
Competency Levels

Professionals at...

• **Level I:** implement practices according to program guidelines and policies.

• **Level II:** demonstrate the skills present at the previous level. In addition, they work independently and take initiative in designing environments to facilitate development.

• **Level III:** demonstrate the skills present at the previous levels. In addition, they design, assess, and modify the learning environment to meet children's changing needs. They also model excellent practices and encourage others to develop proficiency in skills.

• **Level IV:** demonstrate the skills present at the previous levels. In addition, they provide leadership for planning, implementing, assessing, and modifying the program to ensure continuous improvement. They conduct inquiry to advance the understanding of best practices for their communities.

The four levels are intended to be cumulative; a professional working at Level IV has knowledge and skills to meet the competencies at Levels I, II, and III. At all levels, adults who support the growth and learning of young children continue their participation in professional development activities and increase their knowledge and skills within each of the content areas.

Core Competency Content Areas

Each of the eight content areas includes a rationale, or an explanation for the inclusion of each competency area. Following this rationale is the related knowledge base outlining the key research-based indicators in which the competency area is grounded. Finally, a set of practices based on knowledge is included to provide specific approaches and strategies to foster children’s healthy growth and development.

The Competencies for Early Childhood Professionals project was supported by the Virginia Department of Social Services with the federal Child Care Development Fund provided through the Administration for Children and Families, U.S. Department of Health and Human Services. Points of view contained in this document do not necessarily represent the official position or policies of the U.S. Department of Health and Human Services.

For more information on the Competencies for Early Childhood Professionals, contact the Office of Early Childhood Development, Virginia Department of Social Services, 7 North Eighth Street, Richmond, VA 23219.
Competencies for Early Childhood Professionals Area I:

Health, Safety and Nutrition Practices
Competencies for Early Childhood Professionals Area I: Health, Safety and Nutrition Practices

Rationale:
Children’s growth and development, learning, and overall well-being are dependent on safe and healthy physical and psychological environments and on sound nutrition. Competent early childhood professionals, therefore, know their responsibilities under applicable laws and regulations, and they develop policies and procedures to ensure healthy practices that are sensitive to families, employ teaching practices that support children as they become increasingly independent, and work collaboratively with other professionals to make community resources available to children and their families.

Knowledge:
Children thrive when their most basic needs of health, safety, and nutrition are met.

• Health, safety and nutrition practices match children’s developmental stages and individual needs.
• Healthy, safe environments respect both the physical and social-emotional well-being of young children from birth to kindergarten by addressing issues of sanitation, hand washing, use of universal precautions and appropriate responses to emergency care situations that respect children and their diverse reactions to people, places, and situations.
• Early childhood professionals maintain the confidentiality of health records and health information.

Threats to health and safety such as diseases or physical, sexual, and psychological abuse or neglect are often manifested in observable physical, emotional, or behavioral symptoms.

Families hold values and concerns regarding health, safety, and nutrition for their children that reflect their personal and cultural beliefs.

• Families participate with early childhood professionals in developing health, safety, and nutrition policies and practices.
• Families share information about their individual children’s health needs (particularly for children who are medically fragile or who have disabilities) and work collaboratively with early childhood professionals to ensure that their children’s needs are met.
• Families share information about their children’s food preferences, allergies, and cultural practices.

Children engage in active learning experiences to develop health-promoting self-help skills and to construct an understanding of health, safety, and nutrition.

• Children make choices among activities and use a variety of materials and equipment in safe, but challenging, environments both inside and outside.
• Children know and rehearse evacuation and other safety procedures with guidance from early childhood professionals.
• Children develop self-help skills as they dress for the weather, wash their hands, serve themselves snacks and meals, assist in preparing foods, select toys and participate in clean-up activities.
• Children engage in activities that allow them to be active and quiet.
Community resources and health support services are available for children and their families through early childhood programs.

- Health screenings are available for young children.
- Information on community and health resources is made available to families.
- Provision of needed services to medically fragile children and to those with special needs is facilitated.

**Practices Based on Knowledge:**

Sound health, safety, and nutritional practices provide the foundation for development and learning. Competent early childhood professionals, therefore, demonstrate knowledge related to:

1. **Policies, Practices, and Procedures**
   
   Ensure that children’s basic needs of health, safety, and nutrition are met by implementing health policies, practices, and procedures that support children and their families in maintaining healthy lives, preventing injuries and preparing them to respond appropriately to emergencies or injuries;

2. **Abuse/Neglect**
   
   Are alert to indicators of possible illness and to child abuse or neglect and are prepared to respond appropriately if such indicators are observed;

3. **Nutrition and Dietary Practices**
   
   Implement dietary practices that support healthy growth and development while remaining sensitive to family preferences;

4. **Communication with Families**
   
   Communicate with families about health and dietary concerns as well as about community resources that support healthy living for children and their families; and

5. **Health Education**
   
   Implement practices that allow children to become independent and knowledgeable about healthy living.

### 1. Policies, Practices, and Procedures

#### 1.1 General Policies/Procedures

- Follow laws, regulations, policies, and procedures for health, safety, and nutrition such as:
  - Performing a daily health check
  - Documenting health information
  - Monitoring for up-to-date immunizations and routine health screenings as recommended by the American Academy of Pediatrics, the Centers for Disease Control of the United States Public Health Service (CDC-USPHS), and the Academy of Family Practice, taking action to ensure that the services are obtained as a condition for entry or continued enrollment
  - Maintaining emergency contact information
  - Identifying and delineating instructions for child’s health needs (e.g., allergies or chronic illness)

- Implement:
  - Policies regarding confidentiality, health, safety, and nutrition
  - Health assessments of children
  - Arrangement for advice from health consultant (as needed)

- Implement:
  - Health assessments
  - Recommend referral and ongoing follow-up to community health and social service agencies

- Analyze, evaluate, and apply current theory and research related to health, safety, and nutrition policies and procedures.

<td><strong>1.2 Control of Communicable Disease</strong></td>
<td>Routinely wash hands (adults and children) according to best practices recommended by the American Academy of Pediatrics. Examples include, but are not limited to: • Before and after eating/handling food, administering medication, and playing with water used by more than one person • After diapering, toileting, handling bodily fluids, handling pets or animals, and playing in sand boxes • Before and after feeding a child • After arrival at center or when moving from one group of children to another • When leaving the center for the day • After handling garbage, raw meat or cleaning • Sanitize toys, surfaces, and other items that come in contact with body fluids after each child’s use (e.g., after child puts toy in mouth) • Clean table and counter surfaces daily (additionally when needed) • Weekly clean toys not in contact with body fluids (additionally as needed) • Use universal precautions to avoid/control blood-borne pathogens (e.g., where bodily fluids come in contact with surfaces used by others such as in the diapering area, food service area)</td>
<td>Assess each child’s health status daily, objectively document and, if signs of communicable disease are observed: • Notify authorized person • Isolate the child from contact with others until picked up by an authorized person</td>
<td>Maintain current knowledge regarding health, safety, and nutrition concerns in the community in order to inform families and to develop or to update procedures</td>
<td>Provide leadership for developing and implementing procedures to prevent the spread of communicable disease, including: • Develop plan for sharing information with families • Inform others when it is necessary to secure services of health consultant • Establish plan for interim care of children who show symptoms of communicable disease and must be isolated until picked up • Arrange an agreement with health consultant for ongoing consultation to prevent spread of disease</td>
</tr>

<table>
<thead>
<tr>
<th>Competency</th>
<th>Level I</th>
<th>Level II</th>
<th>Level III</th>
<th>Level IV</th>
</tr>
</thead>
</table>
| **1.2 Control of Communicable Disease (continued)** | • Isolate or exclude individuals with symptoms of communicable disease  
• Use appropriate procedures for diapering or changing clothes in case of toileting accidents  
• Use appropriate procedures for handling food  
• Separate food preparation and consumption areas from diapering or toileting areas  
• Communicate with families of children exposed to communicable disease  
• Monitor water used for activities to prevent spread of disease (e.g., water must be clean, children do not drink water used for play, children with hand sores may not participate in water play) | | | |
| **1.3 Routine Oral Hygiene** | Implement guidelines for preventing tooth decay and spread of germs through:  
• Proper cleaning of the mouths of infants who do not yet have teeth  
• Appropriate feeding practices (e.g., not using bottle containing milk or juice as a pacifier)  
• Good nutrition  
• Routine tooth brushing  
• Proper storage of toothbrushes  
• Plaque removal (flossing is recommended after gaps between teeth have closed) | Conduct oral health screenings for each child  
Create playful ways to engage children in oral hygiene routines | Provide guidance to staff and family members about oral health topics such as:  
• Prevention of tooth decay through tooth brushing  
• Appropriate feeding practices to prevent tooth decay  
• Causes of tooth decay and how adult dental health affects child’s dental health  
• Recommendations regarding the use of fluoride  
• Recommendations regarding the use of tooth sealants  
• When to begin dental visits and the importance of finding a dental home | Maintain current knowledge of evidence-based best practices in oral health and provide leadership for implementing practices, and sharing information based on that knowledge with children, families, and staff |
<table>
<thead>
<tr>
<th>Competency</th>
<th>Level I</th>
<th>Level II</th>
<th>Level III</th>
<th>Level IV</th>
</tr>
</thead>
</table>
| **1.4 Reduction of Environmental Hazards** | Monitor the environment for hazards such as, but not limited to:  
• Allergens and asthma-inducing substances  
• Toxic chemicals or gases  
• Mold  
• Improper or broken equipment  
• Extreme heat, cold, or sun  
• Insect-borne disease  
• Vehicle traffic  
• Safe storage and administration of medications  
• Animals (program or visiting pets) without proper immunizations or unsuitable for children | Implement systematic procedures to monitor environmental hazards  
Develop and implement (in consultation with appropriate agencies and consultants) both initial and ongoing methods to monitor the facility and premises for safe indoor and environmental air quality and water purity, unless on a public supply (e.g., radon, carbon monoxide, hidden sources of mold spores, improper venting, etc.) | Maintain current knowledge and inform others about environmental hazards | Maintain current knowledge of identifiable environmental hazards and risks, and establish procedures for reducing the risk of occurrence |
| **1.5 Sanitation Procedures** | Implement guidelines for adhering to laws/regulations and recommendations by the American Academy of Pediatrics for Sanitation Procedures | Plan routine implementation and monitoring of approved sanitation procedures | Model and help others implement best practices for sanitation procedures | Oversee the program staff, assistants, or substitutes to ensure that sanitation procedures are followed |
| **1.6 Prevention of Injuries** | Prevent injuries by practices such as, but not limited to, the following:  
• Maintaining clutter-free space for children to play  
• Inspecting physical environment and equipment and removing safety hazards  
• Supervising children by sight and sound  
• Establishing and maintaining procedures that children follow in order to promote safe use of equipment  
• Arranging safe entry/exit areas, with special attention to motor vehicle traffic and fall hazards  
• Maintaining safe travel conditions (if responsible for transporting children) | Ensure that safety equipment, such as smoke alarms and fire extinguishers, child safety seats, helmets, and gun safety locks are in working condition, know how to use them, and understand that modifications are made (when needed) for children with special health needs and/or physical challenges | Design and monitor the learning environment to reduce the risk of preventable injuries and other emergencies (e.g., check for safety recalls on supplies, toys or equipment and follow guidance to eliminate the hazard; monitor compliance with any asbestos management plan; monitor housekeeping and maintenance routines, etc.) | Plan, implement, assess, and modify policies and procedures designed to eliminate preventable injuries and emergencies (e.g., assess and develop hazard management plans; traffic, transportation and pedestrian safety; injury prevention by types, such as burns, falls, drowning, poisoning, shock; environmental hazards such as lead, asbestos, etc.) |
<table>

</table>
| 1.7 Immediate Response to Injuries      | Attend to injuries according to pediatric first aid training and reporting requirements | Possess the skill and knowledge for administering cardiopulmonary resuscitation (CPR) | Monitor response to injuries and make suggestions for improvement                                      | Develop policies and procedures for:  
  • Responding to, reporting, and documenting injuries  
  • Analyzing injuries, near-injury incidents, and identified hazards to decrease risks (e.g., through re-engineering program methods and further training of staff and children)  
  • Responding to emergencies for all children and staff, including those who have been identified as having special health needs or physical challenges that may need specialized intervention |
| 1.8 Follow-Up Response to Injuries      | Follow policies for:  
  • Documenting and reporting injuries  
  • Communicating with family members about an injury  
  • Assuring the comfort and care of other children while injured persons are receiving attention | Maintain an accessible current list of phone numbers for contacting parents and community services in the event of an injury | Model for and help others acquire skills for appropriately responding to injuries                      | Maintain current knowledge of correct procedures for responding to emergencies and fears, and share this information with others |
| 1.9 Emergency Preparedness              | Know and practice procedures for appropriate response (including emotional support) in the event of an emergency such as fire, severe weather, or an act of violence | Use various strategies to help children understand emergency procedures and the nature of plans to ensure their safety and care in the event of an emergency | Plan and inform others of appropriate response procedures (including emotional support) in the event of emergencies such as fire, severe weather, or an act of violence  
  Know and use community resources available for post-event grief and recovery counseling or other assistance that may be needed in especially severe situations (e.g., serious injury or death of a child or staff, post-traumatic stress following natural or manmade disasters, etc.) | Establish disaster preparedness policies/procedures and emergency response plans, including agreements with community resources for emergency assistance |
2. Abuse/Neglect

### 2.1 Suspected Abuse/Neglect

**Competency:**
Recognize signs of possible emotional distress, abuse, neglect or exploitation, and follow established procedures for documenting and reporting possible occurrences in an immediate and responsive way

**Level I**
- Help others learn to recognize signs of possible emotional distress, abuse, neglect or exploitation, and follow established procedures for documenting and reporting possible occurrences in an immediate and responsive way

**Level II**
- Stay up-to-date and share with others information related to recognizing, documenting, and reporting possible abuse, neglect, or exploitation

**Level III**
- Establish procedures for documenting and reporting suspected abuse, neglect, or exploitation and include this in staff training

### 3. Nutrition And Dietary Practices

#### 3.1 Nutrition

**Competency:**
Recognize dietary needs associated with age-related development and appropriate foods for special needs of children. If food is served, it is from a menu provided by a professional who understands the dietary needs of young children.

**Level I**
- Plan or provide input to ensure the provision of nutritious meals (if meals are served) that meet the required guidelines from the U.S. Department of Agriculture (USDA), Virginia Department of Health (VDH) and Child and Adult Care Food Program (CACFP)

**Level II**
- Plan and evaluate menus (if meals are served) or provide input to ensure that they meet guidelines for sound nutrition including special dietary concerns

**Level III**
- Ensure that nutritional components of the program (if any) are planned, implemented, and assessed on an ongoing basis

**Level IV**
- Model and help others acquire skills needed for meeting USDA, VDH, and CACFP guidelines (if responsibilities include food selection and/or preparation)

#### 3.2 Food Selection and Preparation

**Competency:**
Provide clean drinking water, and, if food is served:
- Offer a variety of nutritious foods
- Exercise strict attention to the safety of all children with food allergies
- Serve only foods that reduce the hazard of choking and other health risks
- Follow regulations regarding any food brought from home
- Provide age-appropriate opportunities for children to participate in mealtime preparation or serving

**Level I**
- Plan and serve nutritious meals (if food is served) that meet the required guidelines (per USDA, VDH, and CACFP) and that have been prepared using methods to maintain maximum nutrition

**Level II**
- Oversee the program to ensure that, if food is served, it is safe and nutritious and that all applicable guidelines are followed and monitored to continuous improvement
### 3.3 Mealtime Behaviors

Model eating behaviors for children that are conducive to healthy living including:
- Creating a setting that is safe, relaxed, and conducive to conversation
- Gradually introducing new foods in ways that enable children to enjoy a variety of nutritious foods

Implement these practices:
- Provide eating utensils, serving equipment, tables and chairs that are the size that can be used comfortably by children
- Incorporate family style meals to help children be comfortable during mealtimes and to assist children in learning self-help skills
- Divide responsibility at mealtimes between the adult (provide food and encouragement) and the child (decide what to eat, how much and whether to eat)

Model and share with others ways to create a mealtime atmosphere that facilitates the development of healthy eating practices

Oversee program to maintain nutrition and mealtime as an integrated part of the program by developing and evaluating mealtime policies that outline expectations of staff, assistants, or substitutes, and children (according to age) for mealtime

Review curricula and program practices to integrate food and dining with appropriate opportunities to learn about food's role in culture and social customs, food production and preparation, and health and nutrition

Competencies for Early Childhood Professionals Area II:

Understanding Child Growth and Development
**Rationale:**
Child development is the foundation upon which early childhood practice is based. Because the psychomotor, socioemotional, cognitive, and linguistic developmental domains are inter-related, early childhood professionals in all types of programs (e.g., family child care homes, early childhood education centers) must comprehend both the processes of development and the adult’s role in supporting each child’s growth, development, and learning.

**Knowledge:**
Human growth, development, and learning become progressively complex over time and are influenced through a variety of experiences and interactions.
- Growth, development, and learning proceed in predictable patterns reflecting increasingly complex levels of organization across the lifespan.
- Each developmental stage has distinctive characteristics; however, progression occurs over time, building from the experiences of earlier stages.
- The psychomotor, socioemotional, cognitive and linguistic domains of development are integrated within the child so that as one area is affected, other areas are also affected.
- Development proceeds at varying rates from child-to-child, as well as across developmental domains for individual children, reflecting the unique nature of each child.
- Development and learning are lifelong processes that must be nurtured in the adults who care for children.
- Parents and family members grow and develop in their understandings of their children as learners and as members of communities outside the home.
- Community members grow in their ability to implement programs and practices that meet the developmental and learning needs of young children.
- Early childhood professionals recognize that as members of the profession, they interact with other early childhood professionals as lifelong learners.

Because growth and development are generally predictable, early childhood professionals can recognize milestones of healthy development and signs of potential delay or disability.

Children express their developing abilities, interests, and learning in a variety of ways; therefore, assessment must reflect this diversity of expression.
- Because growth, development, and learning occur in a variety of ways, documentation and assessment tools and strategies must capture this variety.
- Early childhood professionals must be able to comprehend the patterns of typical and atypical development as they observe and interpret children’s developmental progress.
- Information gathered on children’s growth, development, and learning is shared with early childhood professionals and with parents/guardians to provide ongoing support for continued progress or intervention.

Child development theories and research guide practice for early childhood professionals.
- Developmental theories and ongoing research on human development and learning inform professional practices in the field of early childhood development and education.
- Research in human development, learning, and teaching young children serves as a guide to planning, implementing, and reflecting on practices employed by early childhood professionals.
- Based on current research on typical and atypical development, early childhood professionals implement inclusive practices that support and maximize development and learning for all children.
Children are active learners who draw on their direct physical/sensory and social experiences to construct their own understandings of the world around them.

- Children develop a sense of competence and the ability to interact effectively in social contexts as they live and play in environments characterized by mutual respect.
- Children construct knowledge about the world in which they live through child-initiated and teacher-supported play.
- Children develop small and large motor skills through playful activity with peers and caring adults.
- Children develop communication skills as they interact with other children and with adults who play and talk with them.
- Children develop the ability to think and solve problems as they play with materials, ideas, people, and with various components of the natural environment.
- Children develop abilities to think about and respond in creative ways to the world in which they live as they use their imaginations to create new possibilities through playful activity with materials and other people.

Children are best understood within the contexts of family, culture, and society.

- Although children are unique individuals, their interactions with family members influence their development, dispositions, and learning even as children impact their families.
- Families also interact within environments and cultures, influencing and being influenced through multiple interactions.
- Early childhood professionals are aware that families and community members are vital members of the broader learning community who contribute to children’s healthy growth, development, and learning.
- Society serves as a broad context in which children and their families live, providing resources and limitations that support healthy growth and development.

Practices Based on Knowledge:
Based on current theories and ongoing research in the areas of human growth, development, and learning, early childhood professionals in various care and education settings (e.g., child care centers, family child care homes) must:

1. **Basic Child Development**
   Demonstrate knowledge of the principles and patterns of child development.

2. **Typical and Atypical Development**
   Use knowledge of child development and learning to identify the strengths and challenges of children with typical and atypical development.

3. **Individual Differences**
   Use practices that are responsive to the unique abilities, temperaments, learning styles, and genetic influences on young children as individuals.

4. **Influences on Development**
   Demonstrate knowledge of the impact of family, environment, culture, and society in the development and learning of young children.

5. **Strategic Facilitation of Development**
   Strategically facilitate development by nurturing children’s active engagement in learning through playful activities.

6. **Collaboration**
   Collaborate with other professionals, families, and community members to enhance the development and learning of all children.
<table>

<td>Early childhood professionals at ALL LEVELS have knowledge related to:</td>
<td>Professionals at Level I implement practices according to program guidelines and policies. They:</td>
<td>Professionals at Level II demonstrate the skills present at the previous level. In addition, they work independently and take initiative in designing environments to facilitate development. They:</td>
<td>Professionals at Level III demonstrate the skills present at the previous levels. In addition, they design, assess, and modify the learning environment to meet children's changing needs. They also model excellent practices and encourage others to develop proficiency in skills. They:</td>
<td>Professionals at Level IV demonstrate the skills present at the previous levels. In addition, they provide leadership for planning, implementing, assessing, and modifying the program to ensure continuous improvement. They conduct inquiry to advance the understanding of best practices for their communities. They:</td>
</tr>
<tr>
<td><strong>1. Basic Child Development</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>1.1 Developmental Patterns and Principles</strong></td>
<td>Recognize basic patterns of development that characterize age groups (e.g., 0-3 mo., 4-6 mo., 6-9 mo., 9-12 mo., 12-18 mo., 18-24 mo., 24-36 mo., 3-year-olds, 4-year-olds, 5-year-olds), while also understanding that individual children do not follow these general patterns precisely</td>
<td>Identify physical, motor, cognitive, linguistic, social, and emotional milestones of development</td>
<td>Share information on child growth and development with other professionals and family members</td>
<td>Communicate major theories, research, and issues relevant to child growth, development, and learning to early childhood staff or assistants, families, and community stakeholders</td>
</tr>
<tr>
<td><strong>1.2 Adaptation of Practices as Development Proceeds</strong></td>
<td>Are aware that children of different ages and developmental levels require different methods of care, education, and guidance</td>
<td>Adapt practices for nurturing children as development progresses</td>
<td>Model for others how to adapt educational practices to facilitate development at increasingly complex and challenging levels</td>
<td>Share knowledge with others regarding current theories, research, and policies that enhance development and learning from birth to kindergarten</td>
</tr>
<tr>
<td><strong>1.3 Developmental Domains</strong></td>
<td>Demonstrate awareness that development occurs in different domains (e.g., physical, cognitive, linguistic, social, emotional)</td>
<td>Describe the different domains of development</td>
<td>Help others understand how development occurs in different domains and that development can progress at various rates in different domains</td>
<td>Nurture ability in others to comprehend that rates of development vary across domains</td>
</tr>
<tr>
<td>Competency</td>
<td>Level I</td>
<td>Level II</td>
<td>Level III</td>
<td>Level IV</td>
</tr>
<tr>
<td>--------------------------------------------------------</td>
<td>-------------------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------</td>
<td>-----------------------------------------------------------------------------------------------</td>
<td>-----------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>1.4 Interconnectedness of Domains</strong></td>
<td>Recognize that areas of development are interconnected</td>
<td>Understand that active learning experiences can facilitate development in more than one domain simultaneously</td>
<td>Use knowledge of interconnectedness of domains to:</td>
<td>Share with others (e.g., family members, assistants, staff) current theories and research that explain how development is interconnected across domains and how this information can be applied in facilitating early childhood development</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>• Design holistic learning experiences that capitalize on the interconnectedness of domains to promote development</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>• Explain the behaviors of children based on development across different domains</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>1.5 Stages Versus Continuous Development</strong></td>
<td>Demonstrate awareness that development can be described in terms of broad stages within which development proceeds gradually and continuously</td>
<td>Explain how continuous incremental changes are related to broad developmental stages</td>
<td>Help others comprehend the educational implications of viewing development as continuous versus stage-dependent</td>
<td>Advocate to others practices that foster continuous developmental progression while using stages or benchmarks to guide expectations and plan curriculum</td>
</tr>
<tr>
<td><strong>1.6 Variability in Developmental Milestones</strong></td>
<td>Recognize that the age ranges in which development typically occurs are broad and overlap</td>
<td>Use observations, work samples, and other assessment tools to determine a child’s current skills and abilities</td>
<td>Communicate to others how development is assessed and the implications of assessment for curriculum development</td>
<td>Stay up-to-date on best practices (derived from evidence-based research) for assessing developmental status, make resources available to staff for ongoing developmental assessments, and analyze data collected</td>
</tr>
<tr>
<td>Competency</td>
<td>Level I</td>
<td>Level II</td>
<td>Level III</td>
<td>Level IV</td>
</tr>
<tr>
<td>---------------------------------------------------------------------------</td>
<td>------------------------------------------------------------------------</td>
<td>-------------------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>2. Typical and Atypical Development</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>2.1 Recognizing Variation As Typical</strong></td>
<td>Demonstrate awareness that developmental variations and challenges occur in both typical and atypical development</td>
<td>Describe the normal range of variation in typical development</td>
<td>Identify the unique patterns of behavior that distinguish typical from atypical development</td>
<td>Help inform others of current theory and research on the range of variation in developmental patterns and timelines</td>
</tr>
<tr>
<td><strong>2.2 Recognizing Atypical Development</strong></td>
<td>Recognize skill levels that suggest children’s development is atypical, whether being advanced or delayed in comparison to the average child of the same age</td>
<td>Compare children’s developmental levels with typical milestones to identify whether a child’s skills, behavior, and development are similar to those of most children of the same age</td>
<td>Know how to use observations, work samples, and other assessment tools to appropriately determine and to address current skills and abilities</td>
<td>Oversee the program (i.e., schools, center or family child care home), secure resources and services for developmental assessment</td>
</tr>
<tr>
<td><strong>2.3 Adapting the Learning Environment</strong></td>
<td>Recognize that the learning environment needs to be structured to support children who have special needs due to advanced or delayed development</td>
<td>Modify the learning environment to accommodate children’s individual, unique, and special needs</td>
<td>Have knowledge of evidence-based best practices related to inclusion, including how to locate resources and services for children with special needs</td>
<td>Ensure that staff, assistants, families, and community members are informed of current trends in educating and nurturing children with special needs</td>
</tr>
<tr>
<td><strong>2.4 Indicators of Risk</strong></td>
<td>Demonstrate awareness that certain genetic and environmental factors increase the likelihood of developmental delays or disabilities</td>
<td>Recognize risk factors, delays or disabilities that may indicate a need for special services</td>
<td>Use knowledge of specific developmental delays, developmental disabilities, and risk factors to refer children for specialized services</td>
<td>Assist others in securing consultants to assist with assessments and curriculum adaptations for children with special needs</td>
</tr>
<tr>
<td><strong>2.5 Individualized Family Service Plans (IFSPs) and Individualized Educational Programs (IEPs)</strong></td>
<td>With help, can integrate goals from IFSPs and IEPs into daily activities and routines</td>
<td>Integrate goals from IFSPs and IEPs into daily activities and routines</td>
<td>Participate in evaluation and assessment coupled with formulation of IFSPs and IEPs</td>
<td>Take responsibility for planning, implementing, evaluating, and modifying policies and procedures for IFSPs and IEPs</td>
</tr>
<tr>
<td><strong>2.6 Recognizing and Respecting Developmental Challenges</strong></td>
<td>Recognize and respect developmental differences associated with physical, cognitive, emotional or social challenges</td>
<td>Demonstrate awareness that developmental variations and disabilities have an impact on developmental rates and patterns</td>
<td>Inform others about individual differences in development and learning and how such differences influence development</td>
<td>Share with others current research and theory on developmental variations associated with physical, cognitive, or emotional delays or challenges</td>
</tr>

<tr>
<td><strong>6.1 Collaboration on Behalf of Children</strong></td>
<td>Know how to follow guidelines for implementing IFSPs and IEPs as provided by supervisor or consultants</td>
<td>Collaborate with consultants and parents in planning learning experiences to meet children’s individual needs and interests</td>
<td>Work with families, community members, and early childhood professionals to advocate policies that nurture the development of all children</td>
<td>Analyze and use current knowledge and theories about specific developmental delays, developmental disabilities, and risk factors to advocate on behalf of young children with developmental delays and disabilities</td>
</tr>
<tr>
<td><strong>6.2 Collaboration with Adults</strong></td>
<td>Know how to work with colleagues on behalf of young children</td>
<td>Collaborate with others (e.g., professionals, family members, business leaders) to share reflections on strategies for enhancing the learning environment</td>
<td>Collaborate with peers, families, community members, business leaders, and other professionals to promote optimal developmental outcomes</td>
<td>Apply the principles of human development and psychology that have implications for working with families, community members, business leaders, and other professionals to promote optimal developmental outcomes</td>
</tr>
</tbody>
</table>
Competencies for Early Childhood Professionals Area III:

Appropriate Child Observation and Assessment
Rationale:
Assessments of children, personnel, and programs are conducted through a variety of formal and informal procedures to document and evaluate growth and progress; to design instruction that is informed by children’s developmental abilities; to make decisions about interventions, accommodations, and referrals; to identify teaching strategies that are best suited to facilitate development and curriculum; and to make decisions related to personnel and program effectiveness. Because assessment data guide decisions that affect individual children, staff members, and program plans, early childhood professionals must identify the purposes of assessment, use reliable and valid assessment procedures and instruments, and implement various methods of interpreting and sharing assessment data.

Knowledge:
Assessment and evaluation practices must be valid, reliable, and sensitive to the cultural and linguistic background of the child. They must also be appropriate for the developmental behavior being assessed.
- These practices include observing children in natural situations and documenting observations through a variety of strategies that include anecdotal records and observational checklists; work samples such as drawings, writing samples or dictations; and photographs or videotapes of children's behaviors, creative constructions and playful activity throughout the day.
- Families share information about their children's interests, activities, behaviors, developmental progress, health, and prior experiences.

Assessment procedures must be planned in accordance with up-to-date information on appropriate methods, sensitivity to individual and cultural differences, and with regard to the overall purpose of assessment.
- Informal assessments and initial screenings are used to determine whether additional assessment and/or consultation are needed.
- Formal standardized assessment data are used with informal assessment data to assist in screening and serving children who may need medical or educational interventions.
- Observation, documentation, and assessment procedures are used to meet the unique needs of children.
- Observational strategies are used to identify children’s interests, abilities, and areas for growth.
- Observations are documented in a variety of ways and used to modify the curriculum in response to observational data.

Two-way communication with families allows early childhood professionals to plan for and implement assessments, while families benefit from being informed of assessment results that will guide the child's growth and development.
- The influences of family, environment, culture and language, and diverse ways of learning are recognized and used to present information in a positive, non-threatening, and constructive manner when interpreting assessment results.
- Families are involved in the development and implementation of Individual Family Service Plans (IFSPs) and Individualized Educational Programs (IEPs).
- A variety of professionals collaborate in the development and implementation of IFSPs and IEPs.
- Observations are shared with families to celebrate growth and work collaboratively to address concerns and challenges.

Confidentiality of assessment results must be maintained in accordance with legal and ethical considerations.
Practices Based on Knowledge:
Grounded in knowledge and comprehension of typical and atypical child development, early childhood professionals in all types of settings must:

1. Assessment Plan and Procedures
   Plan assessment procedures that:
   - Use formal and informal methods to identify and document children’s interests, strengths and challenges.
   - Employ assessment theories used for decision making and curriculum planning.
   - Implement assessment practices and interpret results with sensitivity to individual differences in children’s ability levels as well as families’ cultures, languages, and environmental factors.
   - Reflect the overall purpose of assessment and articulate the limits of norm-referenced standardized assessments.

2. Communication with Families
   Communicate with families to share assessment plans and information as well as to plan follow-up services and developmental learning experiences based on assessment.

3. Confidentiality
   Maintain confidentiality of assessment results in accordance with ethical and legal considerations, including the importance of avoiding negative labeling of children.

1. Assessment Plan and Procedures

1.1 Assessment Planning

Follow instructions for implementing assessment plans by:
- Maintaining records about occurrences (e.g., food intake, accidents, health indicators, interests, skills)
- Collecting and filing work samples
- Providing clear, accurate, and objective information about interactions with individual children to families and other professionals according to program policies and guidelines
- Recording frequency and duration of specific child behaviors according to instructions

Identify sources of assessment data (e.g., naturalistic observations, anecdotal records, work samples, parental interviews) and plan a variety of methods to document behaviors and interests on a regular schedule

Create systematic plans and procedures for ongoing assessment of individual children using both formal and informal assessment procedures. This includes:
- Selecting assessment tools that are valid, reliable, and sensitive to cultural and linguistic backgrounds of children
- Creating a schedule for ongoing and periodic collection of assessment data
- Planning how results will be used
- Planning methods for communicating with families about assessment results

Plan, implement, and evaluate systems for ongoing assessment of individual children in all areas of development and behavior in order to identify:
- Interests
- Needs
- Developmental progress
- Possible need for diagnostic testing

Competencies for Early Childhood Professionals Area IV:

Partnering with Families and Community
Competencies for Early Childhood Professionals Area IV: Partnering with Families and Community

Rationale
Children develop in the context of families and communities that are characterized by diversity in family composition, languages spoken, environmental risks/resources, levels of ability, religious belief systems, and cultural practices. While families serve as the primary context for development, early care and education settings comprise a vital context that dramatically impacts development through the quality of care and education provided. Collaborative partnerships with the program’s families and the community’s resources are essential for creating and maintaining environments in which children develop optimally in all areas of functioning. Moreover, communities that adequately support parenting as well as early education and care, thereby contributing to the quality of life for all citizens in the community, tend to grow and to develop socially and economically.

Knowledge
The family serves as the primary context for children’s development.

- Family members are a source of information regarding the family’s goals and values, the child’s previous experiences and current living situation, as well as observations of ongoing development.
- Family members contribute greatly to their children’s development when they are encouraged to communicate openly and honestly about issues, concerns, goals, and values.
- Family members should be nurtured in their roles as advocates for their children’s development and learning by being invited to serve on boards or councils that serve in an advisory capacity to the program.

Children develop in the context of families that differ according to structure, language, ethnicity, belief systems, and cultural practices.

- Effective partnerships with family and community are characterized by mutual trust and respect for the values, attitudes, expectations, and cultures of other individuals, willingness to collaborate in problem-solving, and use of language that can be understood by all.

- Children benefit when professionals understand and respect the family regardless of its composition, internal dynamics, religious beliefs, cultural practices, languages spoken, socioeconomic status, educational level, ability levels, and special interests or goals.
- Practitioners know and use a variety of formal and informal communication strategies to establish and maintain positive reciprocal relationships with families, including at least rudimentary use of languages spoken in the homes.
- Family diversity is reflected in materials and activities used in the learning environment.
- Children’s development is optimized when there is continuity between the home and the early education and care environment in terms of experiences and expectations.
- Practitioners communicate frequently (daily, weekly, or monthly as appropriate to the situation) about specific experiences such as developmental milestones, changes in physical condition, interesting learning opportunities, and emotionally laden experiences so that both family members and early childhood practitioners are able to respond appropriately to the child’s needs.
- Practitioners collaborate with family members to solve developmental challenges by giving and receiving information, providing supportive follow-up to collaborative decisions, and by facilitating access to appropriate community resources.

Early education and care programs benefit from and contribute to the community at large through collaborative partnerships.

Families are best able to rear children when they are adequately prepared to serve as advocates for children.
Practices Based on Knowledge

Early childhood professionals in all types of settings that serve young children facilitate positive reciprocal relationships with families and communities. They:

1. Knowing and Respecting Families
   Know and respect families that they serve.

2. Communication
   Use various communication strategies to establish a working partnership with families (e.g., share information regarding the family in which the child lives, the child’s experiences in care, and the child’s developmental progress) and to involve family members actively in various components of the program.

3. Collaborative Community Partnerships
   Facilitate mutually beneficial linkages among families, agencies, businesses, organizations and other community resources.

4. Nurturing Families as Advocates
   Nurture the capacity of family members to serve as advocates for their own children and for children of the larger community.
Early childhood professionals at ALL LEVELS have knowledge related to:

Professionals at Level I implement practices according to program guidelines and policies. They:

Professionals at Level II demonstrate the skills present at the previous level. In addition, they work independently and take initiative in designing environments to facilitate development. They:

Professionals at Level III demonstrate the skills present at the previous levels. In addition, they design, assess, and modify the learning environment to meet children's changing needs. They also model excellent practices and encourage others to develop proficiency in skills. They:

Professionals at Level IV demonstrate the skills present at the previous levels. In addition, they provide leadership for planning, implementing, assessing, and modifying the program to ensure continuous improvement. They conduct inquiry to advance the understanding of best practices for their communities. They:

### 1. Knowing and Respecting Families

<table>
<thead>
<tr>
<th>Competency</th>
<th>Level I</th>
<th>Level II</th>
<th>Level III</th>

<tr>
<td><strong>2.5 Communicating Regarding Atypical Development or Special Needs</strong></td>
<td>Observe and record children’s development and share relevant information with supervisor</td>
<td>Communicate with families, in a sensitive and confidential manner, regarding possible developmental challenges, suggest follow-up, and provide information on resources to address the need</td>
<td>Model skills and encourage others to communicate with families, in a sensitive and confidential manner, regarding possible developmental challenges, suggest follow-up, and provide information on resources to address the need</td>
<td>Support other professionals in acquiring skills needed to communicate effectively with families regarding suspected delays or special needs</td>
</tr>
<tr>
<td></td>
<td>Avoid the use of negative labels when sharing information about an individual with a disability (i.e., refer to the person rather than the disability)</td>
<td>Avoid the use of negative labeling when referring to a person with a disability</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>2.6 Communicating in Ways Families Can Understand</strong></td>
<td>Recognize the importance of using some of the family’s preferred language when possible</td>
<td>Makes an effort to use, at least at the rudimentary level, the language spoken in the home</td>
<td>Structure the learning environment to incorporate some elements of languages spoken in family homes</td>
<td>Mentor other professionals in using language that is responsive to family preferences</td>
</tr>
<tr>
<td></td>
<td>Find ways to communicate via facial expressions, voice tone, friendly gestures, etc.</td>
<td>Arrange for translation when needed</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Recognize that there may be a need for translation assistance</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>2.7 Maintaining Confidentiality</strong></td>
<td>Maintain confidentiality for children and family members in regard to: • Specific information about family circumstances • Assessment of child’s progress</td>
<td>Share information with families about circumstances under which information will be shared with other agencies</td>
<td>Model and help others develop skills for preserving confidentiality of information about child’s behaviors and results of developmental assessments</td>
<td>Establish policies for implementing, maintaining, and monitoring confidential information and share this information with assistants/staff and family members</td>
</tr>
<tr>
<td></td>
<td>Inform family members about: • Who can gain access to the records kept by the program • What procedures are used to protect records from unauthorized use</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>2.8 Recognizing Symptoms of Stress</strong></td>
<td>Recognize signs of family stress</td>
<td>Listen to family members’ reports of stressful circumstances and organize the learning environment to be responsive to children’s needs during times of unusual stress</td>
<td>Provide information to family members about stress management and relevant community resources</td>
<td>Provide support to other professionals (i.e., assistants, staff members, or colleagues) regarding ways to be responsive to families experiencing stress</td>
</tr>
<tr>
<td><strong>2.9 Nurturing Families in Rearing Children</strong></td>
<td>Assist family members to find reliable sources of childrearing information</td>
<td>Share information from reliable sources on childrearing topics</td>
<td>Arrange formal and informal opportunities for discussion of childrearing topics</td>
<td>Critically review childrearing literature and resources, and select relevant topics and appropriate materials to share with families</td>
</tr>
<tr>
<td>Competency</td>
<td>Level I</td>
<td>Level II</td>
<td>Level III</td>
<td>Level IV</td>
</tr>
<tr>
<td>------------------------------------------------</td>
<td>--------------------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------</td>
<td>--------------------------------------------------------------------------</td>
</tr>
<tr>
<td>2.10 Arranging Opportunities for Collaboration and Support</td>
<td>Use various types of methods for exchanging information and offering support</td>
<td>Plan and implement a variety of opportunities for families to exchange information</td>
<td>Plan, implement, and evaluate various strategies for exchanging information</td>
<td>Ensure that program assistants/staff arrange opportunities for families and staff to exchange information and to provide support for each other</td>
</tr>
<tr>
<td>2.11 Involving Families in Policy Decisions</td>
<td>Clearly communicate policies to family members and listen when they share reactions to policy decisions</td>
<td>Invite family members to comment on policies and be responsive to families’ perspectives to the extent possible within program goals</td>
<td>Model for others and help others develop skills in involving families in policy decisions</td>
<td>Provide leadership in developing opportunities for families’ perspectives to be represented in program policy decisions</td>
</tr>
</tbody>

### 3. Collaborative Community Partnerships

<table>
<thead>
<tr>
<th>Competency</th>
<th>Level I</th>
<th>Level II</th>
<th>Level III</th>
<th>Level IV</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>3.1 Facilitating Education and Awareness of Community Resources</strong></td>
<td>Introduce community resources to the children</td>
<td>Plan for activities that include community resources</td>
<td>Design curricular activities that create an awareness among children of various basic community resources (e.g., police, fire, medical)</td>
<td>Ensure that assistants/staff, children, and family members are aware of community resources</td>
</tr>
<tr>
<td><strong>3.2 Facilitating Linkages Between Families and Community Resources</strong></td>
<td>Can locate a listing of community resources</td>
<td>Share information with families regarding community resources</td>
<td>Refer a family to a community resource for assistance and seek out community resources (when appropriate)</td>
<td>Create and maintain a list of current community resources and make the list available to practitioners and families</td>
</tr>
<tr>
<td><strong>3.3 Facilitating Access to Community Resources</strong></td>
<td>Demonstrate awareness of the importance of helping families locate community resources</td>
<td>Compile and share information with families regarding access to community resources, and help families make the initial contact with community organizations or agencies</td>
<td>Use knowledge of and access to community resources to enrich the curriculum and children’s learning experiences</td>
<td>Promote collaboration among agencies that serve families</td>
</tr>
<tr>
<td><strong>3.4 Agreements with Community Agencies, Organizations, and Businesses</strong></td>
<td>Demonstrate awareness of agreements with community agencies, organizations, and businesses</td>
<td>Communicate with representatives from various community organizations, agencies, and businesses regarding needed services and procedures for gaining access to services</td>
<td>Share with others information related to agreements with community organizations, agencies and businesses</td>
<td>Establish formal and informal agreements with community organizations and agencies that serve families</td>
</tr>
<tr>
<td><strong>3.5 Participating as Citizen in Community-at-Large</strong></td>
<td>Participate in community events occasionally to become familiar with historical and cultural aspects of the community and to create an awareness among community members of the role of early childhood professionals</td>
<td>Participate frequently in community activities and actively inform others of the needs of children and families in the community</td>
<td>Arrange opportunities for children to observe or participate in community events</td>
<td>Collaborate with artistic, historical, and other cultural community resources to further the goals of the local community</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Participate in planning community events that welcome all children and families</td>
<td></td>
</tr>
<tr>

<tr>
<td>4. Nurturing Families as Advocates</td>
<td>Interact with families regularly about routine transitions (daily arrival and departure) and anticipated major transitions (e.g., classroom changes, preschool to kindergarten)</td>
<td>Share information with families about programs and services that might be helpful to families during transitions</td>
<td>Model and help others develop skills for nurturing families to navigate daily and major transitions</td>
<td>Oversee program’s strategies for collaborating with families as primary decision makers for their children and with other programs or schools to facilitate transitions</td>
</tr>
<tr>
<td>4.1 Transitions</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.2 Service Acquisition</td>
<td>Demonstrate awareness of community services that can benefit children and families, and share that information as needed</td>
<td>Nurture family members in their ability to negotiate services on behalf of their children</td>
<td>Nurture families’ abilities to make primary decisions about services or special accommodations needed for the children</td>
<td>Oversee program’s strategies, for building family members’ skills and confidence regarding access to community services</td>
</tr>
<tr>
<td>4.3 Consent to Share Information</td>
<td>Follow guidelines for obtaining family consent before sharing information with other agencies/organizations</td>
<td>Follow guidelines for obtaining family consent before sharing information with other agencies/organizations</td>
<td>Plan and implement procedures for obtaining family consent before sharing information with other agencies/organizations</td>
<td>Oversee procedures for obtaining consent from families before sharing information with other agencies/organizations</td>
</tr>
</tbody>

Competencies for Early Childhood Professionals Area V:

Learning Environment
Rationale
Physical and psychological components of the learning environment dramatically affect children’s cognitive, social, and emotional development during the critical years of childhood when attitudes toward self, others, and future learning are maximally impacted. Research-based knowledge of child development, effective learning strategies, and content guides professionals in planning an integrated curriculum, selecting materials and equipment, planning schedules, and arranging space to create a learning environment that nurtures all areas of development. Curriculum is a key component of the learning environment and includes but is not limited to the arts, literacy, mathematics, physical education, health, social studies, and science. The learning environment is optimally effective when it is designed to foster learning through exploration, play, and appropriately challenging experiences in a context that respects diversity in backgrounds, family structure, and special developmental needs of children.

Knowledge:
Building on an understanding of how children grow and develop, early childhood practitioners design, implement, and monitor the learning environment to support all areas of development. They:

Understand that physical and psychological components of an effective learning environment must be carefully planned, implemented, monitored, and revised on an ongoing basis in order to serve stakeholders in the program (i.e., children, families, practitioners, and the community-at-large) and that effective communication is essential in building respectful relationships among learners, families, and colleagues.

Understand that learning and development is optimized in a nurturing environment that offers opportunities for exploration, play, and challenging experiences that are appropriately matched to the current level of development, interests, and backgrounds of learners.

Understand that curriculum planning for content areas such as, but not limited to Social and Emotional Development, Approaches to Learning, Language and

Literacy, Cognition and General Knowledge, Fine Arts, and Physical Development and Health must be guided by knowledge of content, knowledge of children’s individual needs, and knowledge of effective strategies for facilitating further development.

Understand that schedule planning is important in order to use time effectively and to achieve a balance between active and quiet as well as indoor and outdoor experiences, and individual as well as group activities (when age appropriate).

Understand that, in addition to health, safety, and comfort, the physical environment must be arranged carefully to meet children’s developmental needs for movement and rest, for activity and quiet, and for indoor and outdoor learning experiences, as well as for nurturing autonomy.

Understand that materials and equipment must be selected carefully to ensure health and safety as well as to provide experiences that are appropriate for a variety of developmental levels, individual interests, and cultural backgrounds.

Understand that children are influenced by multiple contexts, and that the child care environment serves children best when goals, plans, and changes in the environment are designed in collaboration with families and community stakeholders.

Practices Based on Knowledge:
Early childhood professionals, regardless of the type of setting (schools, family child care, centers, private schools), plan, arrange, implement, and evaluate the physical and psychological (cognitive, social, affective) aspects of the learning environments that support physical, cognitive, linguistic and social development, as well as emotional well-being in children with a broad range of developmental levels, special needs, individual interests, and cultural backgrounds. They:
1. **Overall Learning Environment**

   Facilitate development in all domains by planning, implementing, monitoring, and revising learning environments that are responsive and that:
   - Are safe, comfortable, challenging, and welcoming to children and their families;
   - Support curriculum goals (skills, concepts, attitudes, and dispositions) in areas such as literacy, mathematics, appreciation of the arts, science, and language by planning activities that capitalize on curiosity, exploration, and play with objects, materials, and artifacts of nature that promote learning about the physical world;
   - Integrate curricular areas in ways that are culturally sensitive, intellectually stimulating, and responsive to children’s interests, developmental abilities, and special needs.

2. **Learning Strategies**

   Create a nurturing environment and utilize learning strategies that stimulate curiosity, encourage participation in exploration and play, and challenge learners to master new skills.

3. **Curriculum**

   Plan curriculum experiences that facilitate the program goals and provide opportunities to acquire concepts and skills that are precursors to academic content taught in elementary school. The curriculum is based upon a philosophical framework that is congruent with the program goals and that stimulates gradual and continuous development in these domains:
   - Social and Emotional Development (includes Relationships with Others, Learning about Self, Expression of Feelings and Self-Regulation)
   - Approaches to Learning (includes Persistence, Initiative and Curiosity, Creativity and Inventiveness, and Reasoning and Problem Solving)
   - Language and Literacy (includes Listening and Speaking, Phonological Awareness and Alphabetic Knowledge, Print Awareness and Concepts, Comprehension, and Early Writing)
   - Cognition and General Knowledge (includes Learning about Mathematical Concepts, Learning about the World, and Learning about Families and Communities)
   - Fine Arts (includes Dance, Music, Theatre, Visual and Performing Arts, and Crafts)
   - Physical Development and Health (includes Gross Motor Development, Fine Motor Development, and Health and Well-Being)

4. **Schedules, Routines, and Transitions**

   Organize the schedule so that routines are both predictable and flexible, with extended periods of time for uninterrupted exploration, play, and project development.

5. **Physical Environment**

   Arrange and monitor the physical environment to provide an aesthetically pleasing space, maintain safety, promote health, support the curriculum, and utilize up-to-date information on environmental impacts on health and learning.

6. **Materials And Equipment**

   Select materials/equipment, arrange physical space, and plan schedules/routines to stimulate and nurture development in all curricular content areas by selecting and making available:
   - A wide variety of safe, clean, challenging, and stimulating materials and equipment that foster curiosity, exploration, play, critical thinking, and problem solving skills.
   - A wide variety of materials and activities that reflect respect for the dignity of all people, regardless of race, ethnicity, social class, family composition, geographic origin, or cultural background.
   - A wide variety of experiences, materials/equipment, and teaching strategies to accommodate a broad range of individual differences in prior experience, maturation rates, learning styles, special needs, cultural practices, and interests.

7. **Collaboration**

   Collaborate with families, colleagues, and members of the broader community to construct learning environments that promote a spirit of unity, respect, and service in the interest of the common good.

<tr>
<td><strong>1.3 Continuity of Care</strong></td>
<td>Provide continuity of care (i.e., same caregiver with child) over an extended period, when providing care for children from birth to three in order to nurture secure attachment relationships and emotional well-being</td>
<td>Provide continuity of care for children from birth to three and articulate to family members the importance of continuity</td>
<td>Help others understand the importance of continuity of care for infants and toddlers from birth to three</td>
<td>Ensure continuity of care when working with infants and toddlers from birth to three</td>
</tr>
<tr>
<td><strong>2. Learning Strategies</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>2.1 Effective Learning Strategies</strong></td>
<td>Use a variety of learning strategies, including: • Play • Small group projects • Open-ended questioning • Conversation • Problem solving • Cooperative learning • Methods of inquiry</td>
<td>Demonstrate skills for: • Storytelling • Implementing music and art experiences • Planning and conducting field trips • Leading group activities for children who are developmentally ready</td>
<td>Model and help others acquire skills in a variety of teaching and learning strategies</td>
<td>Encourage assistants, colleagues and other staff members to practice effective teaching and learning strategies by sharing up-to-date information on best practices derived from evidence-based research</td>
</tr>
<tr>
<td><strong>2.2 Encouraging Participation</strong></td>
<td>Recognize the importance of encouraging children to participate in a variety of activities while remaining sensitive to individual preferences and choices</td>
<td>Actively encourage children to participate in activities, while also demonstrating sensitivity to children’s preferences and choices about whether to participate and to what extent the participation will be (i.e., honoring children’s desire to not participate in every activity)</td>
<td>Model various strategies for encouraging children to participate in activities while honoring preferences and choice</td>
<td>Plan, implement, assess, and modify practices to nurture skills for sensitive encouragement of participation</td>
</tr>
<tr>
<td><strong>2.3 Facilitating Curiosity, Exploration, and Play</strong></td>
<td>Support child-centered curiosity, exploration and play as primary learning strategies</td>
<td>Use a variety of strategies to create experiences that stimulate curiosity, exploration, and play that is appropriate to the child’s age and ability level</td>
<td>Model and nurture others’ skills in creating experiences that stimulate curiosity, exploration, and play that is appropriate to the child’s age and ability level</td>
<td>Stay informed of, and share with others, current research and theory regarding strategic facilitation of curiosity, exploration, and play and creative expression</td>
</tr>
<tr>
<td><strong>2.4 Articulating the Rationale for Play-based Learning Strategies</strong></td>
<td>Describe how curiosity, exploration, and play contribute to all domains of development</td>
<td>Articulate to family members and others how curiosity, exploration, and play facilitate learning and development</td>
<td>Model and help others acquire skills for explaining how curiosity, exploration, and play facilitate learning and development</td>
<td>Help families and other community members and organizations to appreciate the important role of curiosity, exploration, and play in children’s development, and advocate for support of play environments (e.g., playgrounds and museums)</td>
</tr>
<tr>
<td>Competency</td>
<td>Level I</td>
<td>Level II</td>
<td>Level III</td>
<td>Level IV</td>
</tr>
<tr>
<td>------------</td>
<td>--------</td>
<td>---------</td>
<td>-----------</td>
<td>---------</td>
</tr>
<tr>
<td>2.5 Creating a Context that Supports Curiosity, Exploration, and Play</td>
<td>Follow guidelines for creating the physical and psychological context for curiosity, exploration, and play behaviors related to these areas of development: • Physical and motor skills • Cognitive development • Social engagement • Emotional expression • Linguistic development</td>
<td>Structure the environment to provide a supportive context for exploration and play through such strategies as: • Mutually engaging interaction • Reciprocal exchange of actions/words • Turn-taking</td>
<td>Model proficiency in and help others to develop skills in creating environments for optimal facilitation of learning and development through curiosity, exploration, and play</td>
<td>Plan for continuous improvement of program environment in order to facilitate curiosity, exploration, and play</td>
</tr>
<tr>
<td>2.6 Sequential Patterns of Development in Exploration and Play</td>
<td>Recognize that children exhibit different types of physical, cognitive, social, and emotional behaviors in terms of their individual development</td>
<td>Describe the changes in play behaviors that typically occur as development proceeds</td>
<td>Help others understand the developmental progression of exploration and play behaviors that characterize children with typical development</td>
<td>Stay informed of current trends in research and theory related to the development of exploration and play and share this information with others</td>
</tr>
<tr>
<td>2.7 Adapting Learning Environments to Support Learners with Atypical Developmental Patterns</td>
<td>Follow instructions to modify the learning environment to support curiosity, exploration, and play among children with atypical patterns of development</td>
<td>Adapt the learning environment to support curiosity, exploration, and play among children with atypical patterns of development</td>
<td>Model and help others learn ways to adapt the environment to provide optimal support for curiosity, exploration, and play among children with atypical patterns of development</td>
<td>Plan, carry-out, evaluate, and modify environmental factors that provide adaptive support for curiosity, exploration, and play among learners with atypical development</td>
</tr>
</tbody>
</table>
### 3. Curriculum

#### 3.1 Curriculum Philosophy
- **Level I**: Describe basic ideas that guide curriculum development
- **Level II**: Articulate how philosophical ideas affect curriculum development
- **Level III**: Have a written philosophical statement that guides curriculum development and help others develop a philosophical statement
- **Level IV**: Provide leadership for developing curriculum philosophy

#### 3.2 Curriculum Framework
- **Level I**: Use a curriculum framework to implement activities that:
  - Nurture all domains of development
  - Are responsive to families
  - Are responsive to needs of learners of diverse ability levels
- **Level II**: Use assessment of children’s progress to adapt curriculum to nurture gradual and continuous acquisition and integration of new skills among learners
- **Level III**: Model and help others improve skills in adapting curriculum to nurture gradual and continuous acquisition and integration of new skills among learners
- **Level IV**: Provide leadership for curriculum development and implementation

#### 3.3 Social and Emotional Development
- **Level I**: Use attentive, responsive methods to help children acquire skills in:
  - Developing appropriate and positive relationships with others of various ages across the lifespan
  - Learning about the “self” (e.g., how to manage or regulate one’s behavior)
  - Learning to both express feelings and to inhibit unacceptable behaviors when also asserting one’s independence
- **Level II**: Use a variety of attentive, responsive methods to facilitate children’s social-emotional skills, and plan experiences, based on assessment of child’s progress, to facilitate gradual and continuous mastery of these skills
- **Level III**: Model and help others acquire proficient skills to facilitate children’s social-emotional skills
- **Level IV**: Facilitate continuous improvement of social-emotional curriculum using best practices derived from evidenced-based research

#### 3.4 Approaches to Learning
- **Level I**: Provide opportunities for children to develop:
  - Persistence
  - Initiative and curiosity
  - Creativity and inventiveness
  - Reasoning and problem solving
- **Level II**: Use a variety of research-based strategies to facilitate children’s adaptive approaches to learning
- **Level III**: Model and help others acquire proficient skills in nurturing children’s adaptive approaches to learning
- **Level IV**: Facilitate continuous improvement of curriculum goals that facilitate adaptive approaches to learning among young children
<table>
<thead>
<tr>
<th>Competency</th>
<th>Level I</th>
<th>Level II</th>
<th>Level III</th>
<th>Level IV</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.5 Language and Literacy</td>
<td>Provide opportunities through such activities as conversation, field trips, books, and expressive arts, for children to acquire skills in: • Listening and speaking • Phonological awareness and alphabetic knowledge • Print awareness and concepts • Comprehension • Early writing</td>
<td>Have a wide range of skills for promoting language and literacy that are sensitive to the language spoken in the child’s home and that meet the needs of individual learners</td>
<td>Model skills that promote language and literacy development Use assessment data to create learning opportunities that are adapted to the developmental level and learning abilities of individual learners</td>
<td>Facilitate continuous program improvement in language and literacy curriculum</td>
</tr>
<tr>
<td>3.6 Learning about Mathematical Concepts</td>
<td>Provide opportunities for children to explore and play with activities related to: • Numbers and operations • Measurement • Patterns and relationships • Shapes • Spatial sense • Data collection and analysis • Time and sequence</td>
<td>Have a wide range of skills for: • Planning and facilitating play-based mathematics activities that are developmentally appropriate, culturally responsive, and adapted for children with special needs • Integrating with other curriculum content areas and across domains • Using observations, work samples, or other assessment tools to plan experiences that facilitate gradual and continuous development of mathematics concepts</td>
<td>Model and help others: • Plan and facilitate playful curriculum activities that are developmentally appropriate, culturally responsive, and adapted for children with special needs • Integrate mathematics curriculum with other content areas and across domains • Use assessment of child’s progress to plan curriculum experiences that are matched to individual needs, interests, and ability levels</td>
<td>Facilitate continuous improvement for mathematics curriculum goals and activities that are appropriate, culturally responsive, and adapted for children with special needs</td>
</tr>
<tr>
<td>3.7 Learning about the World (Scientific Knowledge and Scientific Inquiry and Exploration)</td>
<td>Provide opportunities for exploration, experimentation, play, and creative expression related to cognitive understanding of the world in content areas that include, but are not limited to: • Scientific Knowledge (e.g., living things, weather, life cycles) • Scientific Inquiry and Exploration (e.g., asking questions, suggesting explanations, collecting and describing information)</td>
<td>Have a wide range of skills for: planning and facilitating play-based science activities that are: • Appropriate to the child’s age and stage • Culturally responsive • Adapted for children with special needs • Integrated with other curriculum content areas and across domains • Based on assessment tools such as work samples, or observations • Facilitate gradual and continuous development of scientific concepts</td>
<td>Model and help others develop a wide range of skills for planning and facilitating play-based science activities that are: • Appropriate to the child’s age and stage • Culturally responsive • Adapted for children with special needs • Integrated with other curriculum content areas and across domains • Based on assessment tools such as work samples, or observations • Facilitate gradual and continuous development of scientific concepts</td>
<td>Facilitate continuous program improvement by using up-to-date evidence-based research on best practices for planning and implementing science curriculum</td>
</tr>
</tbody>

Competencies for Early Childhood Professionals Area VI:

Effective Interactions
(Teacher/Student and Student/Student)
**Rationale:**
Relationships between caring adults and children and among children themselves create the context for healthy social and emotional development. Because children’s relationships with others are based in large measure on their prior experiences, early childhood professionals, regardless of the type of setting in which they practice, must understand the principles and practices that promote an environment that is psychologically safe and secure and that encourages prosocial behavior, conflict resolution, problem solving, and a sense of community for children and their families.

**Knowledge:**
Developmental stages serve as a guide to understanding children’s behavior and interactions with others.
- Successful attachments serve as the foundation for healthy emotional development with other people.
- Children develop a positive sense of themselves and their abilities as they interact in physically and emotionally safe environments that are responsive to their unique individual needs, abilities, and temperaments.
- Children develop successful relationships with their peers as they have opportunities to interact with others of similar and different ages.
- Children’s interaction styles reflect their families of origin, cultures, linguistic diversity, and unique abilities and disabilities.
- Theories of social and emotional development, interactions and group dynamics as well as current research related to development, learning, and practice guide the decisions and actions of early childhood practitioners.

Positive and nurturing relationships support and enhance healthy development and foster successful interactions with peers and with persons at various ages across the lifespan.
- Adult actions toward children reflect an understanding of each child’s value and worth and demonstrate unconditional positive regard, regardless of gender, temperament, abilities/disabilities, culture, language, race, or home background.
- Healthy relationships and interactions occur in environments that are physically and psychologically safe for children and their families.

Communication with children is based on an understanding of the development sequences of language acquisition, expression, and reception.
- Children’s competence in communication reflects their unique abilities as they are expressed within their homes.
- Children communicate with others linguistically as well as non-linguistically using gestures and signs, adaptive devices, and facial expressions.

Children develop competence in managing their own behaviors and solving conflicts with one another by observing and interacting with caring adults who:
- Provide appropriate opportunities for children to become independent by making choices about things that affect them.
- Engage in conversations.
- Support children to learn and practice appropriate and acceptable behaviors as individuals and as members of a community.
- Provide daily schedules, routines, and activities that are responsive to the developmental needs and interests of the children as well as responsive to the unique interests and abilities of individual children.
- Assist children to identify and express their feelings in ways that are culturally and socially acceptable.
- Provide structure and support for resolving conflicts as they occur in ways that reflect an understanding of children’s developmental abilities.
• Understand that challenging behaviors may reflect a variety of contributing factors such as challenges associated with particular developmental stages as well as environmental conditions that are not responsive to children’s age/stage of development (e.g., sitting still or waiting in line too long), emotional stress, disabling conditions that impact a child’s ability to adapt, or by not having been taught the behaviors associated with being a member of the learning community.

As children develop socially, they must learn the skills needed to participate as a member of a group; professionals must understand developmental changes related to being able to enter a group and play an active contributing role.

Families are active participants in guiding children’s behavior.

• Families hold values, ideas and expectations and they employ various interaction styles that reflect a variety of values, cultures, and belief systems.
• Families and early childhood practitioners can work cooperatively to support and address the behavior of children at school through their respectful interactions with each other and with other professionals who serve as resources.

Practices Based on Knowledge:

Building on an understanding of how children grow and develop, early childhood professionals in all types of programs serving young children establish positive relationships with children and their families. They:

1. Relationships
   Create positive and nurturing relationships with each child based on respect, trust, calm approaches, respect for diversity and acceptance of individual differences in ability levels, temperament, and other characteristics.

2. Interactions with Persons of Various Ages Across the Lifespan
   Provide a variety of opportunities to communicate verbally and non-verbally in playful engagements with people of a variety of ages across the lifespan.

3. Group Interactions
   Use various forms of verbal and nonverbal communication frequently with children, and respond to children as individuals as well as to the group as a whole.

4. Communication
   Use guidance practices that are respectful, meet the emotional needs of individual children, clearly communicate expectations for appropriate behavior, promote prosocial behaviors, prevent and minimize behavioral problems through careful planning of the learning environment, teach conflict resolution strategies, and manage challenging behaviors.

5. Guidance
   Use knowledge of group processes and developmental aspects of group behavior to guide the complex challenges required to guide groups of children.

6. Family Collaboration
   Build positive partnerships with children’s families with regard to managing behavior and nurturing development.

</table>
### 1.7 Accepting Individual Differences

- Understand and accept individual differences in behavior as influenced by:
  - Age and stage of development
  - Family background
  - Culture
  - Ability
  - Temperament
  - Individual strengths
  - Interests

- Model acceptance and nurture children’s abilities to understand and accept differences among peers; affirm each child’s cultural, linguistic, developmental, and individual identity

- Model and help others as they develop skills to nurture children’s abilities to understand and accept differences among peers and to affirm each child’s cultural, linguistic, developmental, and individual identity

- Oversee the program’s strategies for promoting acceptance of all persons; stay up-to-date on research and theory that informs professionals’ abilities to understand and accept individual differences and to promote similar understanding between and among children

### 3.1 Group Process and Structure

- Understand group processes (i.e., formation, interaction, dissolution)

- Create opportunities for age-appropriate group as well as individual activities that provide children choice about participation depending on readiness for group experience

- Model for others successful strategies for facilitating entry into a group, establishing group status, assigning roles, and changing group structure

- Provide support to others as they strive to increase this competency by staying up-to-date on evidence-based research that informs best practices

### 3.2 Managing Group Behaviors

- Appreciate the complexity of interactions that characterize group behaviors (in contrast to individual behaviors)

- Observe group behaviors and plan further activities in accordance with current status of various groups

- Model for others successful strategies for managing group behaviors

- Provide support to others as they strive to increase this competency by staying up-to-date on evidence-based research that informs best practices

### 2. Interactions with Persons of Various Ages Across the Lifespan

#### 2.1 Mixed-age Children’s Groups

- Appreciate the importance for children of having opportunities to interact with children that are both older and younger than oneself

- Create opportunities for mixed age peer-group activities

- Model for others successful techniques for managing mixed-age group activities

- Provide support to others as they strive to increase this competency by staying up-to-date on evidence-based research that informs best practices

#### 2.2 Intergenerational Activities

- Appreciate the importance for children of interacting with persons at different stages across the lifespan (i.e., teens, mature adults, aging persons)

- Create opportunities for positive intergenerational activities

- Model for others successful techniques for managing intergenerational learning experiences

- Provide support to others as they strive to increase this competency by staying up-to-date on evidence-based research that informs best practices

### 3. Group Interactions

#### 2. Interaction with Personsof Various Ages Across the Lifespan

- Model acceptance and nurture children’s abilities to understand and accept differences among peers; affirm each child’s cultural, linguistic, developmental, and individual identity

- Model and help others as they develop skills to nurture children’s abilities to understand and accept differences among peers and to affirm each child’s cultural, linguistic, developmental, and individual identity

- Oversee the program’s strategies for promoting acceptance of all persons; stay up-to-date on research and theory that informs professionals’ abilities to understand and accept individual differences and to promote similar understanding between and among children

- Provide support to others as they strive to increase this competency by staying up-to-date on evidence-based research that informs best practices
## 4. Communication

<table>

<th>Level III</th>
<th>Level IV</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>4.1 Engaging in Various Forms of Communication</strong></td>
<td>Engage with children using verbal and non-verbal communication and show individual attention to each child within the group on a regular basis</td>
<td>Use playful interactions as opportunities to build communications skills such as turn-taking, reciprocity, and mutual engagement in a topic of interest</td>
<td>Communicate respectfully with children by listening carefully and responding sensitively to each child as a participant in conversation</td>
<td>Provide support to others as they strive to increase this competency by staying up-to-date on evidence-based research that informs best practices</td>
</tr>
<tr>
<td><strong>4.2 Basic Listening</strong></td>
<td>Listen attentively to children, trying to understand what they want to communicate</td>
<td>Respond sensitively to differences in individual children’s communication styles, use open ended questions, and active as well as passive listening</td>
<td>Employ responsive listening strategies with children who are typically developing as well as with children who have communication challenges to understand the intent of their communication</td>
<td>Provide support to others as they strive to increase this competency by staying up-to-date on evidence-based research that informs best practices</td>
</tr>
<tr>
<td><strong>4.3 Listening for Feelings</strong></td>
<td>Listen respectfully to the thoughts and feelings of others</td>
<td>Actively encourage children to listen with respect to others’ thoughts and feelings by modeling, illustrating, prompting, and coaching</td>
<td>Model and encourage others to develop proficiency in helping children learn to listen with respect to others’ thoughts and feelings</td>
<td>Oversee the program’s strategies for planning, implementing, and assessing the learning environment for appropriate listening skills, and take steps to mitigate deficiencies when identified</td>
</tr>
<tr>
<td><strong>4.4 Verbal and Non-Verbal Expression</strong></td>
<td>Use appropriate and positive verbal and non-verbal skills to express thoughts and feelings in respectful and constructive ways</td>
<td>Use appropriate and positive verbal and non-verbal communication to: • Express thoughts and feelings in respectful and constructive ways • Nurture children’s abilities to express thoughts and feelings in constructive ways</td>
<td>Model and encourage others to develop proficiency in using appropriate and positive verbal and non-verbal communication to express thoughts and feelings in respectful and constructive ways and help others develop proficiency in nurturing these skills in children</td>
<td>Oversee the program’s strategies for planning, implementing, and assessing the ongoing use of appropriate and positive verbal and non-verbal communication to express thoughts and feelings in respectful and constructive ways, and take steps to mitigate deficiencies when identified</td>
</tr>
<tr>
<td><strong>4.5 Communication Frequency</strong></td>
<td>Communicate with children frequently, using both verbal and non-verbal means and face-to-face interactions</td>
<td>Provide multiple opportunities for children to converse with one another and with adults</td>
<td>Model frequent and effective communications and provide support to others as they strive to increase this competency.</td>
<td>Support others as they strive to increase this competency by staying up-to-date on evidence-based research that informs best practices</td>
</tr>
</tbody>
</table>
### 4.6 Vocal Communication Strategies

Articulate sounds and words clearly and appropriately when communicating with children.

Use various strategies to nurture desirable vocal interactions including, but not limited to:
- Using open-ended questions
- Naming objects
- Naming actions
- Describing relationships and ideas
- Describing plans

Model and encourage children to use these vocal strategies when interacting with others.

Monitor the learning environment for frequency and quality of vocal communication and make adjustments if needed, including adjustments in the environment’s acoustic properties if necessary to abate interference with communication.

Analyze up-to-date information on effective communication strategies and styles, model effective communication, and work with others who strive to support child-child and child-adult conversations.

### 4.7 Variation in Communication Strategies

Use various strategies to facilitate children’s communication including:
- Modeling (self-talk)
- Using parallel talk
- Using physical and verbal prompting
- Using restatements
- Expanding statements
- Referring one child to another
- Interpreting messages between children
- Using open ended questions

Use various strategies including modeling and physical and verbal prompting to facilitate children’s communication.

Skillfully use and model various strategies including physical and verbal prompting to facilitate children’s interaction in a manner that is responsive to the immediate situation and particular child.

Oversee the program’s strategies for planning, implementing, assessing, and modifying strategies use various communication strategies.

</table>
### 6. Family Collaboration

<table>
<thead>
<tr>
<th>Competency</th>
<th>Level I</th>
<th>Level II</th>
<th>Level III</th>
<th>Level IV</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>6.1 Positive Communication</strong></td>
<td>Listen to and communicate positively with families regarding behavioral expectations and guidance practices used in the program</td>
<td>Work with families to enhance understanding of children’s needs and appropriate guidance practices</td>
<td>Collaborate with families to develop individually appropriate expectations for children’s behavior and, as needed, refer families to appropriate community and health resources for support in promoting positive behavior in young children</td>
<td>Analyze and articulate current research on child guidance, then share information on guidance techniques and healthy social-emotional development with families</td>
</tr>
<tr>
<td><strong>6.2 Respecting Family Values</strong></td>
<td>Demonstrate respect for the values, ideas, and expectations of families</td>
<td>Communicate respect for the values, ideas and expectations of families including differences in interaction styles and guidance practices</td>
<td>Use direct and indirect strategies for helping children and adults develop and communicate respect for values, ideas, and expectations of families without compromising one’s own values.</td>
<td>Support others’ efforts to create a climate of respect that allows for diversity in values, ideas, and expectations without compromising one’s own values</td>
</tr>
<tr>
<td><strong>6.3 Collaborative Guidance</strong></td>
<td>Communicate with family members about behavioral expectations, values, and ideas by articulating expectations of the program and listening to concerns of family members</td>
<td>Communicate with families regarding areas of concern, developing cooperative strategies to manage problems</td>
<td>Model and help others develop strategies for communicating with families regarding areas of interest and concern, and by developing cooperative strategies to manage problems</td>
<td>Ensure that the program assists families to meet their unique developmental and behavioral interests/concerns for their children and by staying up-to-date on strategies for collaborative guidance</td>
</tr>
<tr>
<td><strong>6.4 Resources for Behavioral Interventions</strong></td>
<td>Seek information and guidance from literature and community agencies that can assist with resolving challenging behavioral issues</td>
<td>Share publications and community resources that provide information and support for responding to challenging behavioral issues</td>
<td>Provide access to information and resources to assist families with children who have unique developmental and/or behavioral issues that suggest outside intervention and/or support</td>
<td>Support others as they develop professional skills for responding to unusually challenging behavioral problems</td>
</tr>

Competencies for Early Childhood Professionals Area VII:

Program Management
Competencies for Early Childhood Professionals Area VII: Program Management

Rationale:
The quality of early childhood education and care is dramatically affected by the competence and leadership of a program leader who plans, assesses, and modifies the program on a continuing basis. Successful programs have leaders who design and manage policies, procedures, and systems that comply with governmental regulations, ensure quality learning experiences for children, and maintain financial soundness. Because children's emotional well-being and social competency is dependent largely on stable and nurturing relationships with caring adults, effective program managers foster an organizational climate that is supportive of staff needs so that highly qualified personnel are recruited and retained. Since optimal development occurs in environments with safe, comfortable, and aesthetically pleasing surroundings that stimulate curiosity and promote active engagement with learning materials, the manager or administrator also oversees the design, arrangement, and maintenance of the facility in which the program is housed.

Knowledge:
Effective managers of early care and education programs understand the fundamentals of management principles, theories, responsibilities, and ethics. They understand that:

- Business/corporate law and regulatory compliance requirements are basic to establishing and operating a business.
- Managerial responsibilities (e.g., planning strategic, tactical, operational, and transitional models; financing, budgeting, organizing, directing, controlling and monitoring, staffing, marketing) are essential components of successful business operation.
- Problem-solving principles, strategies, and techniques as well as critical thinking are crucial to the successful operation of a business.
- Long range and short term strategies can keep a program viable and able to achieve its mission under changing conditions (e.g., macro-environmental scanning, trends analyses, cause-targeted problem-solving, and systematic approaches for continuous quality improvement).
- Policies, procedures and systems must be designed and managed in accordance with the program's mission.
- Positive organizational climate fosters trust, creativity, enthusiastic commitment to the mission, to teamwork, and to inclusion.

The physical facility in which a program is housed has a major impact on all aspects of program functioning and must be safe, comfortable, supportive, and welcoming to children, staff, and families.

Early childhood professionals understand that local, state, and national regulations govern the operation of the program.

- Early childhood care and education programs are subject to all laws and governmental regulations that affect licensure and operation.
- Continuous monitoring is required to ensure that all regulations are met.
- Clearly articulated policies and procedures provide a systematic framework for documenting and reporting compliance with regulation.
- High quality programs achieve standards of excellence that exceed standards for licensure and strive continuously to achieve optimal levels of functioning in all components of the program.

Fiscal soundness is required for program survival.

- Fiscal soundness requires effective budget planning, with attention to priorities that support the mission of the program.
- Effective financial management involves competent use of information and accounting systems.
- Appropriate insurance, including liability insurance, is needed for children, staff, and facilities.
- Income and expenditures should be reconciled on a regular basis.
- Periodic reports on the program's fiscal condition should be made to appropriate stakeholders (e.g., advisory board).
Early childhood professionals understand that human resources management is essential to program success.

- A supportive organizational climate is essential for establishing and maintaining employee satisfaction, which is known to affect recruitment and retention of highly qualified professionals.
- A supportive work environment fosters the abilities of professionals to perform early care and education functions optimally. The supportive work environment includes, but is not limited to the following:
  - Clearly articulated personnel policies and procedures
  - Hiring practices that reflect the social and cultural make-up of the community being served
  - Flexible schedules that accommodate needs of staff members for rest, family responsibilities, activity, planning, and collegial activities
  - Staff compensation that motivates employees to improve skills and continue their employment
  - A physical facility that is comfortable, clean, safe, and aesthetically pleasing with adequate space for rest, instructional planning, and preparation of learning materials
  - Cooperative, inclusive, and mutually supportive collegial relationships among staff members
  - Policies that comply with federal and state laws related to wages and working conditions and that include mechanisms for recourse and adjustment
  - Ongoing professional development opportunities that help retain highly competent early care and development professionals
  - Observation, documentation, and assessment procedures to support the professional development of program staff

Effective program leaders establish policies, procedures, and systems to facilitate implementation of the program’s mission, goals, and philosophy. These functions include, but are not limited to the following:

- Curriculum planning
- Procedures that ensure practice of universal health and safety precautions, including first aid and CPR
- Communication with representatives of community organizations, agencies, and resources
- Communication with families, in writing and in a manner they can understand, regarding the following:
  - Child's developmental progress
  - Physical well-being including, but not limited to, food intake, sleep patterns, signs of illness, and administration of medications
  - Daily routines and plans for special activities
  - Procedures for addressing issues related to guidance of behavior
  - Transportation arrangements
  - Emergency communication and evacuation plans
  - Policies regarding confidentiality
  - Procedures for individualized plans for children with special needs
  - Space allocation for all program functions
  - Schedules for programming, assessment, facility maintenance, employee breaks or vacation
  - Staff assignments and relief staff roster to ensure ample staff to child ratios

Collaborative relationships with community organizations, agencies, and resources that contribute to early childhood care and education are mutually beneficial to children, families, and to the larger community.
Early childhood professionals with leadership responsibilities demonstrate knowledge of a variety of ways to evaluate and modify program goals and activities. For example,

- They develop and use both formative and summative evaluations to comprehensively ensure continuous quality improvement in the program.
- They use both reflective evaluations of their individual practices as well as collaborative evaluations as part of the ongoing program evaluation.
- They involve all stakeholders in program evaluation.

**Practices Based on Knowledge:**
Building on knowledge of sound business practices, effective educational programming, and human resources management, effective administrators design, implement, evaluate and modify policies and procedures that support the organization’s mission to serve children and families. They provide leadership to:

1. **Regulatory Standards**
   - Implement the steps needed to ensure compliance with governmental laws and regulations and with professional standards.

2. **Physical Facility**
   - Design and maintain safe, comfortable and supportive physical environments for children, staff, and families.

3. **Budget Management**
   - Design and implement systems for planning and managing monetary resources.

4. **Human Resources Management**
   - Create an organizational climate that promotes the recruitment, support, development, and retention of highly qualified staff members.

5. **Program Planning and Evaluation**
   - Oversee the planning, implementation, assessment, and continuous improvement of the program mission, goals, and philosophy.
   - Utilize data from program evaluations and involve stakeholders to revise procedures and plan new program goals.

6. **Families and Community**
   Establish and maintain collaborative relationships with community organizations and resources for the benefit of the children and families served as well as for the community as a whole.
Early childhood professionals at ALL LEVELS have knowledge related to:

Professionals at Level I implement practices according to program guidelines and policies. They:

Professionals at Level II demonstrate the skills present at the previous level. In addition, they work independently and take initiative in designing environments to facilitate development. They:

Professionals at Level III demonstrate the skills present at the previous levels. In addition, they design, assess, and modify the learning environment to meet children's changing needs. They also model excellent practices and encourage others to develop proficiency in skills. They:

Professionals at Level IV demonstrate the skills present at the previous levels. In addition, they provide leadership for planning, implementing, assessing, and modifying the program to ensure continuous improvement. They conduct inquiry to advance the understanding of best practices for their communities. They:

### 1. Regulatory Standards

#### 1.1 Required Legal Standards

- Understand and comply with all applicable legal and regulatory standards
- Monitor the environment for continuous compliance with: 
  - Staff policies and procedures
  - Applicable legal and regulatory standards
- Model and help others develop ways to establish and maintain high quality standards that meet or exceed minimal regulatory requirement
  - Thoroughly analyze incidents of non-compliance and develop and monitor a plan of causal or systemic correction to ensure future compliance
- Develop policies, procedures, and training systems to ensure compliance with governmental regulations and professional standards

#### 1.2 Regulations from Other Agencies

- Receive training about other agency requirements
- Assist program leader by keeping records to document compliance with agency regulations
- Help others understand and comply with regulations from other agencies
- Ensure that staff members are appropriately trained on policies and information from other agencies, keep up-to-date information posted
- Develop and review training plans to meet the requirements from the Health Department, OSHA (Blood-Borne Pathogens and Hazardous Materials), Hourly Wage, FMLA, ADA, etc.

<tr>
<td><strong>2.3 Responsibility for Environment</strong></td>
<td>Use practices that contribute to a safe and pleasant learning environment</td>
<td>Conduct systematic monitoring to ensure that the internal and external environments are consistently maintained in safe and serviceable condition</td>
<td>Nurture other professionals’ abilities to arrange and improve the physical components of the learning environment</td>
<td>Oversee routine maintenance and enhancement of the physical environment in order to provide an optimal environment for learning and developing</td>
</tr>
<tr>
<td></td>
<td>Nurture children’s ability to care for the physical environment (e.g., watering plants, sharing art work)</td>
<td>Take steps to arrange and modify the physical environment to support learning and group sharing of a common space</td>
<td></td>
<td>Establish preventive maintenance and housekeeping schedules designed to avoid breakdowns</td>
</tr>
<tr>
<td><strong>2.4 Space</strong></td>
<td>Maintain personal space appropriately and perform routine tasks to manage the use of space for various activities</td>
<td>Plan for effective use of space by adults and children</td>
<td>Help others to arrange space in ways that enhance playful learning, social skills, community building</td>
<td>Oversee ordering, storage and inventory of supplies and equipment for facility maintenance</td>
</tr>
</tbody>
</table>
## 3. Budget Management

### 3.1 Budget Management
- **Level I**: Use materials, equipment, and other resources prudently to avoid waste without compromising quality.
- **Level II**: Keep an ongoing inventory of supplies and materials with attention to the use of low-cost, recyclable materials when possible.
- **Level III**: Continuously update knowledge of cost-effective materials and activities that can enhance children’s learning experiences. Provide information to staff members on budgetary matters, and teach them the principles of program-based budgeting.
- **Level IV**: Develop long range and short-term budget plans designed to facilitate programmatic goals. This includes, but is not limited to:
  - Establishing fees
  - Developing procedures for staff to request resources equitably
  - Distributing budgetary resources equitably
  - Compensating staff for professional development and job performance.

### 3.2 Budget Planning
- **Level I**: Inform supervisor of specific materials or supplies needed, providing supervisor with sufficient lead time.
- **Level II**: Request supplies and materials as needed in accordance with prescribed procedures. Track and project expenses in order to advise staff member with financial responsibility of potential short-falls or surpluses in order to use resources to best advantages.
- **Level III**: Participate in budget planning.
- **Level IV**: Develop a yearly budget to include sufficient resources to achieve program goals; seek input from stakeholders in budget planning. File appropriate reports to entities as required (e.g., taxes, licensing, etc.). Ensure an independent review of accounting records.

### 3.3 Budget Monitoring
- **Level I**: Assist as requested regarding monitoring of expenditures.
- **Level II**: Monitor own resource expenditures.
- **Level III**: Help others acquire skills for monitoring resource expenditure.
- **Level IV**: Develop and/or review monthly and quarterly income and expense statements to determine fiscal status. Adjust spending accordingly and report to appropriate stakeholders (board, funding sources, etc.).

### 3.4 Resource Acquisition
- **Level I**: Demonstrate awareness of the resources (financial, human, material) needed to offer a high quality program.
- **Level II**: Develop strategies for gaining access to material and non-material resources.
- **Level III**: Provide information or assistance for securing grants or other resources.
- **Level IV**: Initiate activities to secure resources (e.g., gifts, grants, in-kind contributions, volunteer time), including collaboration with community organizations.

</tbody>
</table>
### Human Resources Management

#### 4.1 Human Resources Policies

- Review and accept personnel policies that describe the terms of employment; seek clarification or assistance for any performance expectations or terms of employment as necessary.
- Utilize feedback from supervisors to improve practice.
- Monitor environment for signs of failure to comply with policies and report incidences of non-compliance to appropriate authority, if needed.
- Inform others of your observation when incidences of policy violation are noted.
- Orient new staff to policies and keep others informed of changes.
- Provide planned refresher training on policies and procedures.
- Meet with staff member(s) immediately when policies or procedures need to be corrected.
- Conduct regular, ongoing observations of staff and provide coaching to correct undesired practices and provide guidance toward exemplary practices.
- With input from stakeholders develop written human resources policies that are congruent with the program’s mission, goals, philosophy, current laws, and evidence-based best practices.
- Develop and provide staff members with a manual or notebook of standard operating procedures that clearly detail expected methods of performing duties.
- Review and update periodically and after any major incident involving deviation from prescribed practices.

#### 4.2 Internal Communication

- Attend staff meetings and supervisory conferences, and read memos and notices.
- Initiate internal communication (e.g., memos, notices, e-mail messages) when needed.
- Model and support others in initiating appropriate internal communication.
- Develop methods to communicate with staff members individually and collectively (e.g., oral, newsletters, memos, e-mail, bulletin board).

#### 4.3 Schedule

- Adhere to work schedule and maintain attendance.
- Request personal leave well in advance and provide helpful information on activities, lesson plans, and status of each child for the person who will provide coverage.
- Give maximum notice for any unscheduled leave (e.g., illness or family emergency).
- Cooperate with colleagues and supervisor to create flexibility in scheduling.
- Develop and model for others various strategies for creating flexible scheduling and for integrating persons providing temporary coverage into the program with minimum disruption for children and staff.
- Construct flexible work schedule while providing needed consistency for children and families.
- Develop plans and resources to ensure suitable coverage when staff are absent because of planned or unplanned leave, to include appropriate orientation or training and oversight of persons providing temporary coverage.
<table>
<thead>
<tr>
<th>Competency</th>
<th>Level I</th>
<th>Level II</th>
<th>Level III</th>
<th>Level IV</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.4 Employee Satisfaction</td>
<td>Participate in assessments of job satisfaction</td>
<td>Express satisfaction in nurturing children’s development as well as appropriately express concerns about issues related to working conditions</td>
<td>Express appreciation to other staff members for commendable service</td>
<td>Provide leadership for designing a program environment based on research and theory about employee satisfaction – both intrinsic and extrinsic motivators</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Express one’s own concerns and listen to others regarding work conditions and professional satisfaction</td>
<td>Design and implement regular assessments of employee satisfaction and, when appropriate, take steps to reduce factors found to be contributing to dissatisfaction</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Articulate, from research and from experience, the contributions of early care and education to the well-being of society at all levels (i.e., from neighborhood to international aspects)</td>
<td></td>
</tr>
<tr>
<td>4.5 Employee Recognition</td>
<td>Express appreciation to colleagues for their contributions to the organizational climate</td>
<td>Use various strategies to recognize contributions of colleagues, volunteers, and administrators</td>
<td>Model and nurture others’ skills in recognizing contributions of colleagues, volunteers, and administrators</td>
<td>Provide leadership for continuous improvement of policies and systems for employee recognition, especially those that recognize or emphasize team or program-wide cooperation in achievements in order to avoid undue emphasis on competition rather than collaboration</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Model the principle that success is contagious. Seize and create frequent opportunities to celebrate “little victories” – and involve children as well as staff</td>
<td></td>
</tr>
<tr>
<td>4.6 Compensation</td>
<td>Work diligently to fulfill job requirements for which compensation is given</td>
<td>Participate in professional development activities that lead to increased compensation</td>
<td>Encourage others to participate in professional development activities that lead to increased compensation</td>
<td>Design pay scale so that outstanding performance can be compensated. Consider including several bonus plans to encourage excellence (e.g., special efforts to upgrade skills, accomplishment of projects that contribute to child or program achievement, etc.) as a potentially more affordable means of rewarding extra effort without altering the basic compensation structure</td>
</tr>
<tr>
<td></td>
<td>Seek supervisor’s advice on opportunities to attend training or engage in self-study to increase knowledge, effectiveness and value to the organization.</td>
<td></td>
<td></td>
<td>Use a salary scale that is differentiated by role, education, specialized training, and years of relevant experience</td>
</tr>
<tr>
<td></td>

### 5. Program Planning and Evaluation

#### 5.1 Planning the Learning Environment
- **Level I**: Demonstrate awareness that daily activities and routines are created to fulfill the mission, goals, and philosophy of the program.
- **Level II**: Plan learning experiences that support the program’s mission, goals, and philosophy.
- **Level III**: Help to assess and improve the plans’ effectiveness through systematic information collection and analysis.
- **Level IV**: Communicate the plan to families, staff, volunteers, and community.

#### 5.2 Mission, Goals, Philosophy
- **Level I**: Review and demonstrate an understanding of the program’s mission statement, goals, and philosophy.
- **Level II**: Articulate the program’s mission, goals, and philosophy to families and other professionals.
- **Level III**: Assist with research necessary for periodic assessment of changes in the internal and external environments, market base, labor pool, economic indicators, etc., to help determine whether adjustments in mission, goals, and objectives are needed.
- **Level IV**: With input from stakeholders, provide leadership for developing mission statement, program goals, and philosophy.

#### 5.3 Program Evaluation
- **Level I**: Participate in program assessment by sharing information as requested by evaluation team.
- **Level II**: Participate in program assessment by sharing information as requested by an evaluation team and suggesting additional areas that should be included.
- **Level III**: Participate in program evaluation by reviewing and interpreting assessment data.
- **Level IV**: Conduct an annual program evaluation and share the information with appropriate stakeholders.

- **Level IV**: Help stakeholders understand implications of evaluation results for developmental outcomes of children and their families.
- **Level IV**: Use assessment results to develop action plans for professional development of staff members.
- **Level IV**: Invite stakeholders to participate in analyzing and interpreting implications of assessment data for program revision.
- **Level IV**: Respond to feedback from governing or advisory board or council and take leadership for continuous quality improvement.
- **Level IV**: Plan, implement, and revise as needed, systemic procedures for assessing progress toward achieving program mission and goals.

Competencies for Early Childhood Professionals Area VIII:

Teacher Qualifications and Professional Development
Rationale:
Professional development in early childhood education contributes to continuous advancement of the field by supporting ongoing development of knowledge and practices that contribute to the quality of life for all young children and their families. Professionalism in early childhood education and care requires (a) engaging in ongoing dialogue with others, both within and outside the field, to advance the state of knowledge through various types of observation, research, and reflection; (b) communicating the importance of high quality care and education for young children; and (c) constructing and monitoring compliance with guidelines for best practice that exceed governmental requirements. Early childhood professionals must understand the laws and regulations that guide practice, as well as voluntary standards that exceed legal requirements. As individuals committed to improving the lives of young children and their families, early childhood professionals serve as effective advocates for policies and procedures that support optimal development. Above all, professionals in the field of early childhood model high standards for ethical practice.

Knowledge:
Professional practice in early childhood education and care is governed by quality indicators prescribed by federal, state, and local laws and regulations, and by policy statements of governing boards. It is enhanced by standards and position statements of professional organizations.

- Early care and education professionals make decisions concerning program planning and practice based on current federal, state, and local laws and regulations for safe, nurturing, inclusive, and enriching programs.
- In addition to meeting legal and regulatory requirements, professionals take steps to achieve high quality standards advocated by professional organizations that often exceed legal requirements.

Professional development is an ongoing process of maintaining current knowledge and practice, participating in ongoing professional development opportunities, and engaging in ongoing synthesis and critical analysis of research and theory as it is applied to practice.

- Professionalism requires knowledge and competency in all areas of child growth and development, educational strategies, and skills to develop, implement, and manage high-quality programs.
- Professionalism requires the integration of reflective teaching practice into daily program operations.
- Professional development is demonstrated and evaluated by early childhood professionals through the construction and implementation of job performance plans.
- Professional development requires a commitment to continue learning through reading, research, reflection, and ongoing dialogue with other professionals.

Professionalism includes advocacy for improving the quality of life for all young children and their families.

- Professionalism includes the ability to explain professional practice as it relates to research, theory, and professional guidelines and standards.
- Professionalism involves the ability to clearly articulate the significance of the early years and the value of early childhood education and care programs to families and to the community while working collaboratively with families, colleagues, and community members to develop program practices and policies that are responsive to and appropriate for children and their families.
- Professionalism promotes leadership skills that enable early childhood practitioners to develop skills needed in order to advocate for high quality programming at local, state, and federal levels.

Professionalism involves the ability to interact ethically with colleagues and families as well as with board and community members to build partnerships that support growth and development of the entire learning community.
Professionalism includes a commitment to a code of ethics that respects the confidentiality of all members while working to support the healthy development of children and their families.

Practices Based on Knowledge:
Early childhood professionals in a variety of types of settings where young children learn and develop:

1. Commitment to Quality
   Focus on integrating high quality standards and practices into the development, implementation, and management of programs serving young children and their families.

2. Professional Development
   Demonstrate commitment to acquiring and maintaining current professional knowledge and to ongoing professional development. This includes acquiring the necessary skills to engage in competent research and to contribute to the professional and popular literature in order to expand the base of knowledge within the profession and for the public at large.

3. Advocacy
   Advocate high quality early childhood care and education programs that serve young children and their families.

4. Ethics
   Interact with colleagues, families, board members, and the broader community in ethical ways to build authentic partnerships that support the healthy growth and development of young children. Follow and model a professional code of ethics.
## Early childhood professionals at ALL LEVELS have knowledge related to:

### Proficiency at Level I
Professionals at Level I implement practices according to program guidelines and policies.
They:

### Proficiency at Level II
Professionals at Level II demonstrate the skills present at the previous level. In addition, they work independently and take initiative in designing environments to facilitate development.
They:

### Proficiency at Level III
Professionals at Level III demonstrate the skills present at the previous levels. In addition, they design, assess, and modify the learning environment to meet children's changing needs. They also model excellent practices and encourage others to develop proficiency in skills.
They:

### Proficiency at Level IV
Professionals at Level IV demonstrate the skills present at the previous levels. In addition, they provide leadership for planning, implementing, assessing, and modifying the program to ensure continuous improvement. They conduct inquiry to advance the understanding of best practices for their communities.
They:

## 1. Commitment to Quality

### 1.1 Regulatory Standards
Understand and comply with legal and regulatory mandates related to daily practices that promote safe and healthy learning environments for children and professionals.
Maintain high quality standards that exceed minimal regulatory requirements.
Model and help others develop ways to establish and maintain high quality standards that exceed minimal regulatory requirements.
Assume leadership for developing, implementing, and revising the practices that meet and exceed regulatory codes.

### 1.2 Quality Improvement
Follow guidelines to implement practices that exceed governmental regulations.
Set up a system for documenting practices that exceed governmental requirements and comply with current standards recommended by professional organizations.
Model for others and help others develop practices that meet high quality standards recommended by professional organizations.
Plan, implement, assess, and modify strategies to meet high quality standards recommended by professional organizations.

<tr>
<td>2.1 Content Knowledge</td>
<td>Possess skills in math and language equivalent to the level of a high school graduate</td>
<td>Possess skills in math, language/literacy, science, social studies, and early childhood content equivalent to having completed two years of post-secondary education</td>
<td>Possess knowledge and skills in math, language/literacy, science, social studies, and early childhood content as appropriate for a graduate of a four-year institution of higher learning</td>
<td>Possess an advanced degree in early childhood education and use that degree to provide leadership that promotes continuing education for self and others</td>
</tr>
<tr>
<td>2.2 Use of Resources</td>
<td>Use materials, time, and space effectively</td>
<td>Develop various systems for effective use of materials, time, and space</td>
<td>Model and encourage others to use effectively materials, time, and space</td>
<td>Oversee the effective use of materials, time, and space in the program</td>
</tr>
<tr>
<td>2.3 Hygiene and Appropriate Dress</td>
<td>Practice good hygiene and dress appropriately for interacting with young children in a variety of indoor and outdoor activities</td>
<td>Continue to practice good hygiene and appropriate dress and help others understand the importance of dressing appropriately for a variety of activities</td>
<td>Model and encourage others to practice good hygiene and to dress appropriately for working with young children in a variety of indoor and outdoor activities</td>
<td>Plan and implement strategies for encouraging assistants and/or staff members to practice good hygiene and to maintain appropriate appearance for interacting with young children in a variety of indoor and outdoor activities</td>
</tr>
<tr>
<td>2.4 Professional Attitude</td>
<td>Demonstrate a positive, responsible, sensitive, and respectful attitude in working with young children and their families</td>
<td>Further develop skills for demonstrating positive, responsible, sensitive, and respectful attitudes in working with young children and their families</td>
<td>Model and encourage others to demonstrate positive, responsible, sensitive, and respectful attitudes in working with young children and their families</td>
<td>Provide leadership in development and maintenance of positive, responsible, sensitive, and respectful attitudes in working with young children and their families</td>
</tr>
<tr>
<td>2.5 Positive Relationships with Colleagues</td>
<td>Demonstrate care for and acceptance and support of others working in the program</td>
<td>Further extend care and acceptance of others working in the program by listening to concerns and by providing supportive assistance when appropriate</td>
<td>Model and encourage others to demonstrate care for and acceptance of others working in the program</td>
<td>Provide program leadership for establishing and improving practices of caring for and accepting others</td>
</tr>
<tr>
<td>2.6 Professional Work Habits</td>
<td>Exhibit professional work habits including confidentiality, respect for all people, dependability, time management, independence, and teamwork</td>
<td>Further extend efficiency and effectiveness in work habits</td>
<td>Model and encourage others to exhibit professional work habits including confidentiality, respect for all people, dependability, time management, independence, and teamwork</td>
<td>Oversee ongoing strategies to facilitate improvement in work habits including confidentiality, respect for all people, dependability, time management, independence, and teamwork</td>
</tr>

<td>---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>2.7 Supporting Program Goals</td>
<td>Show commitment to program goals and participate in their achievement and periodic review</td>
<td>Align activities with program goals</td>
<td>Help others find ways to contribute to attainment of program goals</td>
<td>Monitor and share with others the program’s progress toward goals</td>
</tr>
<tr>
<td>2.8 Continuous Updating of Knowledge</td>
<td>Attend orientation, read/view training materials on early childhood education and care, and/or participate in additional opportunities to increase competency for working with young children and families</td>
<td>Read professional journals and communicate with other professionals (e.g., conferences, workshops) to learn about current trends and best practices (derived from evidence-based research) for working with young children and families</td>
<td>Review current evidence-based research on early childhood practices and make decisions based on current information</td>
<td>Practice and disseminate knowledge in local, state, regional, and national publications and/or meetings</td>
</tr>
<tr>
<td>2.9 Participating in Reflective Practice and Research/Inquiry</td>
<td>Participate in reflective practice or research by keeping records, sharing observations, and/or providing technical support to researchers</td>
<td>Formulate questions that arise from ongoing practice and seek answers through observation, journaling and reflection, reading research, or consultation with other professionals</td>
<td>Read research and apply beneficial techniques or knowledge as appropriate</td>
<td>Plan and carry out research/inquiry designed to generate information that informs practice. Provide leadership for planning, implementing, and evaluating ongoing research designed to answer practical questions related to best practices</td>
</tr>
<tr>
<td>2.10 Philosophy of Early Childhood Practice</td>
<td>Support and implement program philosophy and begin to formulate own philosophy of education</td>
<td>Articulate a personal philosophy of early childhood professional practice informed by theory and research</td>
<td>Model for and support others as they develop and articulate a philosophy of early childhood professional practice</td>
<td>Oversee the development of program philosophy and assist others as they develop and articulate a philosophy of early childhood professional practice</td>
</tr>
<tr>
<td>Competency</td>
<td>Level I</td>
<td>Level II</td>
<td>Level III</td>
<td>Level IV</td>

<tr>
<td>2.11 Foundations of Early Childhood Practice</td>
<td>Demonstrate awareness of developmental milestones and good early childhood practice</td>
<td>Demonstrate understanding of major theories and principles of development and commit to using them to implement good early childhood practices</td>
<td>Identify historical, philosophical, psychological, and social foundations of education including early childhood education and help others understand their relevance to practice</td>
<td>Oversee continuous program improvement based upon current trends in early childhood practice and an understanding of the foundations of early childhood practice and education</td>
</tr>
<tr>
<td>2.12 Balancing Work and Personal Growth</td>
<td>Strive to prioritize responsibilities and balance daily commitments</td>
<td>Recognize causes and symptoms of “burnout” and develop strategies to prevent it</td>
<td>Model behaviors that promote the ability to balance responsibilities and make choices that minimize staff stress</td>
<td>Develop and implement personnel practices that promote staff morale by listening carefully to concerns of assistants/staff members and by taking initiative to continuously improve the work environment</td>
</tr>
<tr>
<td>2.13 Continuous Professional Development</td>
<td>Participate in professional development activities such as: • Attend orientation • Read or view training materials on early childhood education and care • Consult with other professionals • Learn to do library and Internet research to explore information for immediate use and to expand knowledge base</td>
<td>Have a professional development plan that includes acquiring additional knowledge and skills through activities such as: • Staff development workshops • Professional organizations • Reading professional publications • Formal course work • Journaling and reflection • Seeking and using feedback from other professionals</td>
<td>Explore models of professional development and promote others’ professional growth through modeling, consulting, and mentoring</td>
<td>Ensure that assistants and staff members develop and implement professional growth plans that reflect understandings of adult learning theory, personal and organizational change theory, and current research in early childhood education</td>
</tr>
</tbody>
</table>

3. Advocacy

| 3.1 Communicating with the Broader Community | Communicate clearly with parents and colleagues about early childhood practices | Participate in local community activities and share information about the early childhood profession | Communicate effectively as a speaker and writer, providing information about services and policies that affect young children and their families | Participate in the broader professional community and mentor other staff by providing opportunities for them to participate in regional or statewide councils that advocate high quality services and programs for young children and their families |

3.2 Understanding Professional Advocacy | Be aware of state and local policies that affect children and families and work in the community to promote positive change | Promote quality in program regulation and other services for young children and their families | Identify community needs that affect children and advocate for programs and services to promote accessible and affordable quality services for children and their families to address those needs | Provide leadership in identifying community needs that affect children and in advocating for programs and services to promote accessible and affordable quality services for children and their families |

<tr>
<td>4. Ethics</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.1 Ethics in Communications and Interactions</td>
<td>Abide by the professional code of ethics for early childhood care and education that prohibits interacting in any way that is physically or emotionally harmful, disrespectful, dangerous, exploitive, or intimidating to children and their families</td>
<td>Demonstrate ethical behavior by following all applicable early childhood care and education regulations and adhering to a professional code of ethics</td>
<td>Articulate and use a professional code of ethics and be able to explain its relevance and importance to new practitioners and to the general public</td>
<td>Nurture other professionals in their articulation and use of professional code of ethics</td>
</tr>
<tr>
<td>4.2 Ethics Pertaining to Confidentiality</td>
<td>Behave ethically, protecting confidentiality of written and spoken information</td>
<td>Recognize potential violations of confidentiality and take steps to mitigate the situation</td>
<td>Model and help others acquire skills for appropriate protection and release of confidential information</td>
<td>Ensure that the program has policies regarding treatment of confidential information and share this with others</td>
</tr>
<tr>
<td>4.3 Commitment to Other Professionals</td>
<td>Advocate for policies and services that improve the quality of life for practitioners in the early childhood profession</td>
<td>Advocate for livable wages and societal esteem for early childhood professionals</td>
<td>Provide support to assistants/colleagues as they develop skills to advocate for policies that improve the early childhood profession</td>
<td>Provide leadership for activities that demonstrate commitment to other early childhood professionals</td>
</tr>
<tr>
<td></td>
<td>Recognize the physical and emotional demands of conscientious practice</td>
<td>Nurture and support colleagues, assisting them to avoid burnout by finding ways for professional and personal renewal</td>
<td>Anticipate the strains and disappointments of the profession and develop services and strategies to support and preserve staffs’ resiliency, commitment, and effectiveness</td>
<td></td>
