Virginia’s Child Care Subsidy Program

2018 Market Rate Survey Report

Theis, Michael (VDSS)
Introduction

The Administration for Children and Families in the United States Department of Health and Human Services requires each state to conduct a child care market rate survey within two years of submitting their Child Care and Development Fund (CCDF) plan. The survey is used to determine whether the state’s reimbursement rate level for child care providers participating in the Child Care Subsidy Program ensures equal access statewide to all types of child care regardless of the child’s age, geographic location, or provider type. It also serves as a guide for the establishment of payment rates used by the Subsidy Program.

The Virginia Department of Social Services (VDSS) contracted with the Social Science Research Center (SSRC) at Old Dominion University to conduct the survey. The SSRC conducted the survey from December 2017 through February 2018. At VDSS, the Office of Research and Planning cleaned and analyzed the survey responses.

Child Care Facilities Sampled

The population for the survey is the priced child care market that provides services to the general public. Head Start providers were excluded since they do not charge the families a fee. In addition, providers who provide services to only those children who receive services through the Child Care Subsidy Program were excluded, because the rates charged are often the state’s maximum reimbursable rate, which does not necessarily reflect what the general public is charged.

The providers included in the survey were the universe of licensed child care centers, religiously exempt providers, licensed family day homes, and providers approved under local ordinance in the city of Alexandria and in the counties of Fairfax and Arlington. All providers were included in the sample except for those providers excluded at initial screening.

Survey

The survey instrument, found in Appendix 1, is a variation of the instrument used by the department for many years. The instrument has been modified for use in the Computer Assisted Telephone Interview (CATI) system that the Social Science Research Center at Old Dominion uses. Logic tests are programmed into the CATI survey system that prompt an interviewer to initiate a follow-up question when inconsistent responses are provided, such as when the reported toddler rate is greater than the infant rate, since the cost of infant care is
usually greater than that of toddler care. The survey employs branching logic that excludes questions that do not apply based on a provider’s response.

The survey solicits information on the amount charged for full time care for infants, toddlers, pre-school, and school-age children, using the age ranges for each child group established by the Department’s Division of Licensing Programs. Additional survey questions solicit information on any additional services provided and the cost associated with providing those services, such as care for children with special needs, evening or overnight, weekend, drop-in, and sick childcare. The survey also contained questions about a provider’s participation in the subsidy program, barriers to subsidy program participation and whether a provider requires the family to pay the difference between the full rate charged minus the subsidy and copayment amount.

**Data Collection**

Prior to administering the survey, SSRC trains interviewers on use of the survey instrument and the use of the CATI system. Supervisors are present during all interviews and interviewers are not allowed to enter data outside the range of pre-specified response categories. The SSRC attempted to call all non-respondents on differing days and times of the week, until they can be ruled out for completion. A tracking protocol was used to locate updated contact information for non-respondents. This protocol included the use of directory assistance, the Internet, and a survey-sampling firm.

**Final Call Disposition**

A total of 6,672 child care facilities (3,296 centers and 3,376 family providers) were included in the sample. Of these facilities, 220, or 3%, were ineligible because they no longer provide a service or their phone numbers were not working or had changed with no further information available. After excluding the ineligible providers, 6,452 providers remained for the survey (3,253 centers and 3,199 family providers).

Prior to the survey, a letter was sent to subsidy providers explaining the reason and timing of the survey and encouraging them to participate. The refusal rates might decrease with a more comprehensive campaign alerting all providers about the survey and urging their participation. The Division of Licensing Programs has emails for most providers that might aid in this outreach effort.

The combined response rate for centers and family providers was 55%, with the center response rate at 65% and 44% for family providers.

**Percentile Analysis and Rates**

The Maximum Reimbursable Rate (MRR) is the maximum amount paid for care based on the child’s age and the locality where the care is provided. In Virginia, there are two MRR levels (Level 1 and Level 2). Level 1 vendors include unlicensed and unregulated child care providers. Level 2 vendors are comprised of licensed or regulated providers including: Licensed Family Day Homes; Licensed Child Day Centers; providers approved under a local ordinance, Licensed Family Day System Approved Family Day Homes, Department of Education Approved Child Care Programs, and Child Care approved by the United States Department of Defense. Level 2 vendors provide approximately 94% of the subsidy care in Virginia.

The current Level 1 rates in Virginia were established in 2001 and have not been revised since then. At the time of the survey, the Level 2 rates have been in effect since September 2014 when the rates increased to the 50th percentile of the 2012 market rate survey.

Comparing the current Level 2 MRR in use to the 2018 survey results provides a gauge of how the rates may have changed over time. The MRR for all ages and all provider types was at the 49th percentile of the 2015 survey results but fell to the 41st percentile using the 2018 survey results. From the 2015 to 2018 survey results, the infant rate fell from the 41st percentile to the 35th and preschool decreased from the 48th to the 40th percentile.

</table>
The Department raised the Level 2 Maximum Reimbursement Rate (MRR) to the 70th percentile of the 2017-2018 Market Rate Survey effective June 1, 2018. The new locality level rates are found in Appendix 2. This increase constituted the largest subsidy rate increase in many years. It provides families the option to access a larger pool of providers and better compensates providers.

For all ages and provider types (center, family), the new rates percentile saw a 28.7% increase over the existing MRR. The average rate for center care increased by 28.2% and family care increased by 31.8%. Regardless of provider type, infant and toddler rates each increased by about the same percentage. Pre-school family care increased by 34.2% while center care only
increased by 29.7% and school age had a similar trend with an increase of 31.5% for family and a 26.4% increase in center rates.

Cost of Health and Safety Standards and Quality Care

The 2017-2018 Market Rate Study did not ask questions about the cost to providers of meeting health, safety and quality standards although the Department is mindful of the requirement’s impact. It is understood that changes as a result of the reauthorized Child Care and Development Block Grant act will cause some expenditures. In addition to the significant rate increase, the lead agency has taken additional steps to help providers address costs associated with health, safety and quality, including making preservice, first aid, and CPR training available free of charge. Further, the cycle for background checks has been moved from 3 years to 5 years, and the state is picking up the cost of background checks in the short term, thus reducing fiscal burden on providers.

Virginia has not yet implemented tiered reimbursement for Subsidy providers participating in Virginia Quality (Virginia’s quality rating and improvement system). However, the lead agency conducted a tiered reimbursement study in 2014/2015. The study found that subsidy rates would need to increase by 6.5% - 28.1% to address the cost of quality and maintain provider profitability. Level 2 rates were increased in June 2018 to the 70\textsuperscript{th} percentile of the results of the market rate survey completed in February 2018. Overall, the Level 2 rates increased by 29%, exceeding the general percentages indicated by the tiered reimbursement study.

Barriers to Subsidy Participation

The survey asked providers who currently do not participate in the subsidy program to identify one or more of the barriers to participation. Of the 1,060 total non-subsidy providers responding, 646 were centers and 414 were family day homes. The majority of the responses (69% of family day homes and 57% of centers) identified no requests for subsidy child care as the barrier to participation. The next highest impediment to participation was the program’s administrative burden, the response for 22% of centers and 11% of family day homes. Approximately 21% of the center and family responded that payment after service, the reimbursement rates and the payment schedule prevented their participation in the subsidy program.

Percent of responses by Barrier Category and Provider Type

**Subsidy Providers Charging Families Paying Additional Amounts**

The 2018 Market Rate Survey had 802 subsidy center provider respondents; 322 (40%) stated they would charge subsidized families the difference between their private pay amount and the subsidy payment. Of the 422 subsidy family home providers 244 (58%) would charge the additional amount.

Using an extract of child care service records from April 2016 through March 2017, 4,147 child care center cases (40%) could expect to pay an additional amount for care above the subsidy payment and any co-payment amount. The median additional amount for center care was $46 per case per month. For families served by family home providers, only 452 (6%) of the total cases would have been required to pay an additional amount with a median additional monthly amount of $68. With the rate increase effective 6/1/2018, it is anticipated that fewer providers will need to collect additional amounts from families.
The following is the basic survey and CATI instructions used for both center and family providers.
