

The Virginia Department of Social Services (VDSS) Child Care Subsidy Program announces **IN-HOME CHILD CARE**

VDSS Child Care Subsidy is offering a temporary child care program to provide care in the home of a child or children who reside in the same household. This program provides an option for parents who may have non-traditional hours or chose to keep their children at home. Potential child care providers can be friends, neighbors or family members. Other providers may also apply.

Once the child care provider is approved by the Child Care Subsidy Program, the parent can request the provider's services through their local department of social services. A temporary rate of \$10.00 per hour will be paid for the care of the children during the current state of emergency.

Interested child care subsidy providers may apply by visiting childcareva.com.
