

Permissions and Instructions Case Scenarios

Read the following scenarios. Use your Handouts to answer the questions. handouts.

1. Martha, a three-year-old child in your program has asthma. She sometimes needs her inhaler to help manage her attacks, especially in the fall. When Martha's mother enrolled her in your program five months ago, she provided an extra inhaler for you to have available for use in the event of an asthma episode. Today you notice Martha is wheezing and is telling you she is having a difficult time breathing.
 - a. Which Handout are you going to use to determine the minimum permissions and instructions needed?
 - b. What is the minimum parental permission you must have on file in order to give Martha Ventolin®, a prescription asthma inhaler?
 - c. What are the minimum health care provider instructions you must have on file in order to give Martha Ventolin®?

2. Jonathan is a two-year-old in your program. His father arrives at your program to drop Jonathan off in the morning and tells you that Jonathan has an ear infection and needs to get a dose of a prescription antibiotic ear drops while in the program. He asks that you start giving Jonathan his prescription ear drops today.
 - a. Which Handout are you going to reference to determine the minimum permissions and instructions needed?
 - b. What permissions and instructions would you need to continue to give the medication beyond ten days?

3. Milo is a two-and-a-half-year-old in your program. He is normally very active and playful but today you notice he appears tired and irritable. You take his temperature. It is 101.1°F. You contact his mother to have her take Milo home. She tells you she will be there as soon as possible but is about one hour away. Earlier this month, she left Tylenol® chewables to be administered as needed. She requests that the medication be administered. The instructions she gave you matches the instructions written on the Tylenol® box for his age and weight.
 - a. Which Handout are you going to reference to determine the minimum permissions and instructions needed?

Handout 2.12 - Case Scenarios
