

VIRGINIA REPORTABLE DISEASE LIST

Please Note: Reporting Speed (Column B) refers to reporting requirements for the Virginia Department of Health. The Virginia Department of Social Services (VDSS) requires notification within 24 hours once it has been determined an outbreak has occurred.

Disease	*Reporting Speed	Likely to See in ALFs/ADCs?
Bed bugs		Yes
Campylobacteriosis (Campylobacter spp.)	Within 3 Days	Yes
Candida auris, infection or colonization b	Within 3 Days	Yes
Carbapenemase-producing organism, infection or colonization	Within 3 Days	Yes
Chickenpox (Varicella virus)	Within 3 Days	Yes
Chlamydia trachomatis infection	Within 3 Days	Yes
Coronavirus disease 2019 (COVID-19 or SARS-CoV-2)	Within 3 Days	Yes
Cyclosporiasis (Cyclospora spp.)	Within 3 Days	Yes
Giardiasis (Giardia spp.)	Within 3 Days	Yes
Gonorrhea (Neisseria gonorrhoeae)	Within 3 Days	Yes
Haemophilus influenzae infection, invasive	Immediately	Yes
Hepatitis A	Immediately	Yes
Hepatitis B (acute and chronic)	Within 3 Days	Yes
Hepatitis C (acute and chronic)	Within 3 Days	Yes
Hepatitis, other acute viral	Within 3 Days	Yes
Human immunodeficiency virus (HIV) infection	Within 3 Days	Yes
Influenza A, novel virus	Immediately	Yes
Influenza, confirmed	Within 3 Days	Yes
Influenza-associated deaths if younger than 18 years of age	Immediately	Yes
Lead, blood levels	Within 3 Days	Yes
Legionellosis (Legionella spp.)	Within 3 Days	Yes
Listeriosis (Listeria monocytogenes)	Within 3 Days	Yes
Lyme disease (Borrelia spp.)	Within 3 Days	Yes
Measles (Rubeola)	Immediately	Yes
Meningococcal disease (Neisseria meningitidis)	Immediately	Yes
Mumps	Within 3 Days	Yes
Norovirus		Yes
Outbreaks, all (including foodborne, healthcare-associated, occupational, toxic substance-related, waterborne, and any other outbreak)	Immediately	Yes
Pertussis (Bordetella pertussis)	Immediately	Yes
Rabies treatment, post-exposure	Within 3 Days	Yes
Salmonellosis (Salmonella spp.)	Within 3 Days	Yes
Scabies		Yes
Shiga toxin-producing Escherichia coli infection c	Within 3 Days	Yes
Shigellosis (Shigella spp.)	Within 3 Days	Yes
Streptococcal disease, Group A, invasive or toxic shock	Within 3 Days	Yes
Streptococcus pneumoniae infection, invasive and	Within 3 Days	Yes
Syphilis (Treponema pallidum), congenital, primary, secondary, and other	Immediately	Yes
Tuberculosis, active disease (Mycobacterium tuberculosis complex) a	Immediately	Yes
Unusual occurrence of disease of public health concern	Immediately	Yes

Not commonly seen but still reportable:	Reporting Speed	Likely to See in ALFs/ADCs?
Amebiasis (<i>Entamoeba histolytica</i>)	Within 3 Days	No
Anthrax (<i>Bacillus anthracis</i>)	Immediately	No
Arboviral infections (e.g., CHIK, dengue, EEE, LAC, SLE, WNV, Zika)	Within 3 Days	No
Babesiosis (<i>Babesia</i> spp.)	Within 3 Days	No
Botulism (<i>Clostridium botulinum</i>)	Immediately	No
Brucellosis (<i>Brucella</i> spp.)	Immediately	No
Chancroid (<i>Haemophilus ducreyi</i>)	Within 3 Days	No
Cholera (<i>Vibrio cholerae</i> O1/O139)	Immediately	No
Coronavirus infection, severe (e.g., SARS-CoV, MERS-CoV)	Immediately	No
Cryptosporidiosis (<i>Cryptosporidium</i> spp.)	Within 3 Days	No
Diphtheria (<i>Corynebacterium diphtheriae</i>)	Immediately	No
Disease caused by an agent that may have been used as a weapon	Immediately	No
Ehrlichiosis/Anaplasmosis (<i>Ehrlichia</i> spp., <i>Anaplasma phagocytophilum</i>)	Within 3 Days	No
Granuloma inguinale (<i>Calymatobacterium granulomatis</i>)	Within 3 Days	No
Hantavirus pulmonary syndrome	Within 3 Days	No
Hemolytic uremic syndrome (HUS)	Within 3 Days	No
Leprosy/Hansen's disease (<i>Mycobacterium leprae</i>)	Within 3 Days	No
Leptospirosis (<i>Leptospira interrogans</i>)	Within 3 Days	No
Lymphogranuloma venereum (<i>Chlamydia trachomatis</i>)	Within 3 Days	No
Malaria (<i>Plasmodium</i> spp.)	Within 3 Days	No
Neonatal abstinence syndrome (NAS)	Within 3 Days	No
Ophthalmia neonatorum	Within 3 Days	No
Plague (<i>Yersinia pestis</i>)	Immediately	No
Poliovirus infection, including poliomyelitis	Immediately	No
Psittacosis (<i>Chlamydophila psittaci</i>)	Immediately	No
Q fever (<i>Coxiella burnetti</i>)	Immediately	No
Rabies, human and animal	Immediately	No
Rubella [a], including congenital rubella syndrome	Immediately	No
Smallpox (<i>Variola virus</i>)	Immediately	No
Spotted fever rickettsiosis (<i>Rickettsia</i> spp.)	Within 3 Days	No
Tularemia (<i>Francisella tularensis</i>)	Immediately	No
Typhoid/Paratyphoid infection (<i>Salmonella Typhi</i> , <i>Salmonella Paratyphi</i> (all types))	Immediately	No
Vaccinia, disease or adverse event	Immediately	No
Vibriosis (<i>Vibrio</i> spp.) d	Immediately	No
Viral hemorrhagic fever	Immediately	No
Yellow fever	Immediately	No
